Index ,1926 *Market as a Weapon* Anton Oleinik,2017-09-08 Power is all encompassing in Russia and mediates most interactions among people including everyday decisions Even the recent administrative reforms in the country which began at the end of the 1990s have tried to reshape the government institutions and modernize the country through the use of power Changes were initiated and implemented by people vested with power Power convention and trust can all support coordination However in the Russian institutional context power tends not only to supplement the alternative coordination mechanisms but also to substitute them Power can be used to solve problems related to social action by merging two or several centers of decision making into one The actor vested with power decides exactly how coordination and adjustment can be achieved This path breaking volume shows how power turns into a unique coordination mechanism and what are consequences of such transformation for everyday life and businesses *Market as a Weapon* focuses on issues of power and domination using the configuration of power relationships in Russia as a critical case but goes far beyond a narrowly defined scope of country specific studies Particular emphasis is put on domination by virtue of a constellation interests in the market since this is a relatively underexplored yet broadly used technique for imposing will in all countries that heavily rely on interventionist policies Instead of being a liberating force the market becomes an additional instrument facilitating the continuous reproduction of power which explains the title of the book Both qualitative and quantitative data including more than one hundred in depth interviews with experts state servants and businesspeople in Russia as well as statistics are used throughout the text of this major book *The Creationists* Ronald L. Numbers,1993-01-01 Forty seven percent of the

American people according to a 1991 Gallup poll believe that God made man as man is now in a single act of creation and within the last ten thousand years Ronald L Numbers chronicles the astonishing resurgence of this belief since the 1960s as well as the creationist movement s tangled roots in the theologies of late nineteenth and early twentieth century Baptists Presbyterians Lutherans Adventists and other religious groups Even more remarkable than Numbers s story of today s

widespread rejection of the theory of evolution is the dramatic shift from acceptance of the earth's antiquity to the insistence of present day scientific creationists that most fossils date back to Noah's flood and its aftermath and that the earth itself is not more than ten thousand years old Numbers traces the evolution of scientific creationism and shows how the creationist movement challenges the very meaning of science *Ethics in the Virtual World* Garry Young, 2014-09-11 *Ethics in the Virtual World* examines the gamer's enactment of taboo activities in the context of both traditional and contemporary philosophical approaches to morality The book argues that it is more productive to consider what individuals are able to cope with psychologically than to determine whether a virtual act or representation is necessarily good or bad The book raises pertinent questions about one of the most rapidly expanding leisure pursuits in western culture should virtual enactments warrant moral interest Should there be a limit to what can be enacted or represented within these games Or is it all just a game *Studying Management Critically* Mats Alvesson, Hugh Willmott, 2003-08-28 An excellent source for graduate students especially in the field of human resource development who are exploring areas for future research of a critical nature *Adult Education Quarterly* Drawing upon a range of influential contemporary movements in the social sciences primarily upon critical traditions such as the Critical Theory of the Frankfurt School this text provides a wide ranging analysis of management and its various specialisms The book offers critical understandings of key areas of management theory and practice such as accounting strategic management marketing business ethics and environmental management It also examines the relations between power and discursive practices in the modern corporation the role of architecture as a repressive and emancipatory force in organizations gender and organizations and critical methodology for organizational research Key issues of power knowledge relations across these areas are addressed and new agendas both for these fields and for management studies as a whole are introduced Contributing authors include Mats Alvesson Gibson Burrell David Cooper Karen Dale Stan Deetz Linda Forbes John Forester John Jermier David Levy Joanne Martin Glenn Morgan Martin Parker Mike Power Richard Loughlin and Hugh Willmott **Reviews in Operator Theory, 1980-86** Paul Richard Halmos, 1989 *Family Business Debates* Oscar Javier Montiel Méndez, Salvatore Tomaselli, Argentina Soto Maciel, 2022-11-28 *Family Business Debates* provides a novel ground breaking approach to diverse and contemporary topics in current business management research focusing on family enterprises to study both the positive and negative aspects of such commercial structures **Reader's Guide to Periodical Literature Supplement**, 1922 *H, Natural science.
