explains why planets rotate or not on their axis The end result is that he proves beyond any shadow of a doubt that gravitational attraction is a myth it just isn't needed And Astrophysics as we know it today is obsolete An asteroid is said to be heading our way in February of 2013 Scientists are uncertain if it will strike us or not Since the event is so close to the infamous Mayan date of December 21 2012 Atkins insists that we take a closer look at it He even explains that we have the technology to foil this event by a temporal time technique Using the natural engine of the asteroid we can speed it up or slow it down so that it isn't here when we are Pretty clever
