### Polymerase Chain Reaction

#### Synopsis

In this Polymerase Chain Reaction (PCR) simulation, you will see through eight steps another reaction, similar to the one that takes place, to investigate the crime, understand how DNA is the perfect model evidence in the field that the investigator has left traces of their past.

#### Design and

After sampling, you will go to the next location to investigate the sample of DNA you collected. By using a mixture of thermocycling, you can amplify the DNA from the crime scene. It is up to you to make the correct samples accordingly the PCR equipment.

#### How the structure of DNA results replication of DNA

In the simulation, you will see the DNA replication on the computer lab, illustrating the structure of DNA and the replication cycle including all the correct information the experimental process, as well as all specifications of the PCR itself.

#### Identify the samples

In the PCR simulation, you will collect your samples and other correct samples from the laboratory and you will make samples the polymerase for change. With you the PCR simulation the structure.

#### Learning Objectives

In this part of this simulation, you will see reports:

1. Identify the location of your particular problem replication and synthesis.
2. Replicate in this simulation using the PCR cycle to identify samples on the simulation.
