### Investment in the Future

- [illegible]

**Abstract**—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and heart rate reserve (HRR) of sedentary middle-aged men. The subjects were 15 men, 40 to 50 years of age, who were sedentary and had no cardiovascular disease. They were randomly assigned to a 12-week training program or a control group. The training program consisted of three sessions per week of aerobic exercise at 70% of the maximum HR. The control group did not exercise. The HR and HRR were measured at rest and during maximal exercise at the beginning and at the end of the 12-week period. The results showed that the training program significantly increased the HR and HRR at rest and during maximal exercise. The control group showed no significant change in HR and HRR. The results suggest that a 12-week training program can improve the cardiovascular fitness of sedentary middle-aged men.

If you are submitting T-type awards, follow the instructions regarding set out by the original grantor. If the action being requested (the 10 days/points or full) involves an award requires an action or full and no other strategy review the

- Day and night periods that are longer than the standard 24 hours occur most commonly with the use of artificial light or other light sources. To avoid this, there are two things the patient should do:
  - Avoid exposure to bright light at night
  - Avoid exposure to bright light during the day
- The end of the day is the best time to take the medication. The patient should avoid bright light during the day and at night. The patient should avoid bright light during the day and at night.
- The patient should avoid bright light during the day and at night.

When you install your T-Value One Connection, improper installation of all four screws (50 combinations for One Connection) will void the warranty. Please, before installing, refer to the correct installation instructions. Failure to maintain proper ventilation may result in a variety of problems with the product.

- When a producer's price for the output rises or falls, it must adjust its output level accordingly. For example, if the price of the output rises, the producer will increase its output level until the marginal revenue is equal to the marginal cost.
