Keepers of the American Dream Christine E. Sleeter, 2012 This book reports an ethnographic study of thirty teachers from eighteen schools who participated in a staff development programme in multicultural education The study examines how multicultural education was actually presented to teachers and areas in which their classroom teaching and perception of students changed over the two year period Although most of the teachers reported learning a good deal changes in their teaching and their discussions of teaching were fairly limited After reporting the data the book examines why changes were limited analyzing three areas the nature of staff development and how multicultural education was packaged the structure of schools as institutions and the identities and life experiences of teachers as White women often from working class backgrounds *Normal Instructor and Teachers World*, 1928 **Catalogue of Copyright Entries**, 1926-07 **Bulletin** Virginia. State Board of Education, 1926 **Basic and Applied Perspectives on Learning, Cognition, and Development** Charles A. Nelson, 2013-05-13 Although current views of cognitive development owe a great deal to Jean Piaget this field has undergone profound change in the years since Piaget's death This can be witnessed both in the influence connectionist and dynamical system models have exerted on theories of cognition and language and in how basic work in cognitive development has begun to influence those who work in applied e.g. educational settings This volume brings together an eclectic group of distinguished experts who collectively represent the full spectrum of basic to applied aspects of cognitive development This book begins with chapters on cognition and language that represent the current Zeitgeist in cognitive

science approaches to cognitive development broadly defined Following a brief commentary on this work the next section turns to more applied issues Although the focus here is on arithmetic learning the research programs described have profound implications for virtually all aspects of education and learning The last chapter views cognitive development from the perspective of ethology and evolutionary biology and in so doing provides a theoretical perspective that is novel and in some ways prescient specifically how can our views of cognition incorporate recent work in biology *Maryland School Bulletin* Maryland.
