and India which are having a huge impact not just on the international economy but also in the geopolitical and international strategy sphere as a result of an accelerated globalisation by these two countries which is unleashing powerful economic challenges to corporate structures economic institutions and law worldwide The big question is how after centuries of underdevelopment China and now India are emerging powerfully and pulling ahead of Western European economies Analysing the role of the state and the adroit use of law and their impact on the corporate evolution of both China and India provides greater clarity and insight into why China has evolved as a manufacturing nation utilizing cheap abundant labour while India has not exploited such advantages but instead focused on IT and higher value industries even abroad as Tata has demonstrated in the motor industry in Europe Again while Chinese corporations have expanded abroad as an arm of the state into Asia Middle East Africa Europe Latin America and parts of the southern states of the USA India has pushed principally into Europe through the efforts of powerful minority capitalists of Parsi and Gujarati background overcoming technological gaps and differences through acquisitions and absorptions of existing corporations in particular industries especially in steel automobiles and textiles In China state owned corporations have been dominant In India though state owned enterprises have been powerful since 1951 it has been private capitalists with an established stronghold since the colonial period and even under the Socialist period from 1951 1991 who have been the more productive main actors both in India and abroad

**INDIAN STOCK MARKET AND INSTITUTIONAL INVESTMENTS** Dr. Sridhar Ryakala, 2017-12-01 Global integration the widening and intensifying of links between high income and developing countries has accelerated over the years Over the past few years the financial markets have become increasingly global The Indian market has gained from foreign inflows through the investment of Foreign Institutional Investors FIIs Following the implementation of reforms in the securities industry in the past few years Indian stock markets have stood out in the world ranking During the past few years India has emerged as one of the world's fastest growing economies The increasing interest of foreign players in the domestic broking industry is a testimony of the stock market's growth The Indian stock market has also received a thrust from rise in business transactions over the years because of sharp drop in brokerage fees and transaction costs launch of a slew of new products and a robust regulatory environment The importance of institutional investors particularly foreign investors is very much evident as one of the routine reasons offered by market analysts whenever the market rises it is attributed to foreign investors money and no wonder we see headlines like FIIs Fuel Rally etc in the business press This is not unusual with India alone as today's most developed economies might have seen a similar trend in the past Domestic institutional investors on the other hand being another important section of institutional investors are playing a vital role in the Indian stock market These investors have emerged as important players in the Indian stock market and their activities are influencing the market There are many instances where this section of investors has stabilized the market conditions on one hand whereas their moves took the market to destabilized position on the other hand Therefore both FIIs and DIIs have become the most

important determinants in the functioning of the Indian stock market Thus increasing role of these institutional investors has brought both quantitative and qualitative developments in the stock market viz expansion of securities business increased depth and breadth of the market and above all their dominant investment philosophy of emphasizing the fundamentals has rendered efficient pricing of the stocks Hence there is a need to examine how investments made by these two groups of institutional investors impact each other as well as stock market returns This book is an attempt in that direction

*The Dirty Dozen* N. Sundaresha Subramanian,2024-04-26 The sensational rise and shocking downfall of India s twelve largest corporate defaulters In June 2017 the Reserve Bank of India sent shockwaves through the

nation as it disclosed a list of the country's twelve biggest defaulters who were responsible for approximately a quarter of all bad loans in the Indian banking system. The alarming discovery of the dirty dozen pulled back the curtain on the murky landscape of corporate irresponsibility and regulatory neglect, revealing the harsh reality of gross economic disparity, complacent governance and coordinated deceit. In *The Dirty Dozen*, business journalist N Sundaresha Subramanian investigates the cause and impact of India's chronic bad loan issue. Recording the economic misadventures of Vijay Mallya, Nirav Modi and Jatin Mehta among others, he lays bare the intricate maze of financial chaos, political plunder and malpractices that ail the country's corporate landscape. In doing so, he makes an eye-opening diagnosis of the nation's financial health since liberalization. In a country where millions struggle for basic sustenance, *The Dirty Dozen* offers a brave, hard-hitting and much-needed exposé of crooked business moguls who have orchestrated deeply damaging financial manoeuvres and amassed millions enjoying impunity nonetheless, leaving India's economy teetering on the edge.
