Sinha,Shoma Sinha,2022-02-15 ENGINEERING PHYSICS OF HIGH TEMPERATURE MATERIALS Discover a comprehensive exploration of high temperature materials written by leading materials scientists In Engineering Physics of High Temperature Materials Metals Ice Rocks and Ceramics distinguished researchers and authors Nirmal K Sinha and Shoma Sinha deliver a rigorous and wide ranging discussion of the behavior of different materials at high temperatures The book discusses a variety of physical phenomena from plate tectonics and polar sea ice to ice age and intraglacial depression and the postglacial rebound of Earth s crust stress relaxation at high temperatures and microstructure and crack enhanced Elasto Delayed Elastic Viscous EDEV models At a very high level Engineering Physics of High Temperature Materials EPHTM takes a multidisciplinary view of the behavior of materials at temperatures close to their melting point The volume particularly focuses on a powerful model called the Elasto Delayed Elastic Viscous EDEV model that can be used to study a variety of inorganic materials ranging from snow and ice metals including complex gas turbine engine materials as well as natural rocks and earth formations tectonic processes It demonstrates how knowledge gained in one field of study can have a

strong impact on other fields Engineering Physics of High Temperature Materials will be of interest to a broad range of specialists including earth scientists volcanologists cryospheric and interdisciplinary climate scientists and solid earth geophysicists The book demonstrates that apparently dissimilar polycrystalline materials including metals alloys ice rocks ceramics and glassy materials all behave in a surprisingly similar way at high temperatures This similarity makes the information contained in the book valuable to all manner of physical scientists Readers will also benefit from the inclusion of A thorough introduction to the importance of a unified model of high temperature material behavior including high temperature deformation and the strength of materials An exploration of the nature of crystalline substances for engineering applications including basic materials classification solid state materials and general physical principles Discussions of forensic physical materialogy and test techniques and test systems Examinations of creep fundamentals including rheology and rheological terminology and phenomenological creep failure models Perfect for materials scientists metallurgists and glaciologists Engineering Physics of High Temperature Materials Metals Ice Rocks and Ceramics will also earn a place in the libraries of specialists in the nuclear chemical and aerospace industries with an interest in the physics and engineering of high temperature materials

Curriculum, Personal Narrative and the Social Future Ivor F. Goodson, 2014-06-05 Recent writing on education and social change and a growing number of new governmental initiatives across Western societies have proceeded in denial or ignorance of the personal missions and biographical trajectories of key public sector personnel This book stems from an underpinning belief that we have to understand the personal biographical if we are to understand the fate of social and political initiatives In education a pattern has emerged in many countries around the world Each new government enshrines targets and tests to ensure that teachers at the frontline delivery are more accountable Whilst this often provides evidence of symbolic action to the electorate or professional audiences the evidence at the level of service delivery is often far less impressive Targets tests and tables may win wide support from the public but there are often negligible or even contradictory effects at the point of delivery enforced by the ignorance or denial of personal missions and biographical mandates This book locates most of its analysis and discussion at the point of culture clash between centralised dictates and individual and collective life missions Whilst the early part of the book considers a range of issues related to school curriculum the focus on the biographical and life narrative becomes increasingly important as the analysis proceeds Curriculum Personal Narrative and the Social Future will be of key interest to practising teachers educational researchers and students on teacher training courses postgraduate courses and doctoral courses
