

"Algebraic Perfect Squares"

Some quadratic expressions are known as **"perfect squares"** because they can be factored into the form $(a + b)^2$.

$$x^2 + 4x + 4 = (x + 2)^2$$

$$x^2 + 10x + 25 = (x + 5)^2$$

$$x^2 - 20x + 100 = (x - 10)^2$$

What do you notice about the following expression: $x^2 + 12x + 36$?

$$x^2 + 12x + 36 = (x + 6)^2$$

Neill, 2012-11-12 The first part of this book charts and analyses 2 688 working days of 384 teachers in 91 LEAs in 1991 It shows how they spent their working lives how well matched their teaching was to their academic background and the balance between teaching and other aspects of their work The analysis uses five major categories Teaching Preparation Administration Professional Development and Other Activities The authors argue that there is an occupational split between the managers and the teachers The second part comments on the findings by relating them to issues of school management and teacher professionalism arguing that conscientiousness poses a professional dilemma for secondary teachers

New Realities of Secondary Teachers' Work Lives Pam Poppleton, John Williamson, 2004-05-10 There are many books on educational change its origins processes and consequences The unique contribution of this volume lies in its careful documenting and reporting of the reactions of teachers themselves interviewed in 9 countries about the changes they have experienced and in the comparative nature of the study which employs both qualitative and quantitative methods in a complementary way In Part One the educational background to the study in each country is described and teachers responses to a common research semi structured interview schedule are reported In Part Two the same database is subjected to a statistical analysis for comparative purposes in order to reveal similarities and differences between countries The project set out to obtain an international picture of the changes in education which have had the greatest impact on the lives of teachers to explore how actual and perceived changes have influenced teachers experience and practice and to identify critical factors in the implementation of change The result is a book that will enable students to familiarise themselves with practices in other countries and policy makers to evaluate the implications of changes in different social economic and cultural environments
