A Guide to Teaching in the Active Learning Classroom Paul Baepler, J. D. Walker, D. Christopher Brooks, Kem Saichaie, Christina I. Petersen, 2023-07-03 While Active Learning Classrooms or ALCs offer rich new environments for learning they present many new challenges to faculty because among other things they eliminate the room's central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed. The importance of learning how to use these classrooms well and to capitalize on their special features is paramount. The potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different from traditional classrooms and lecture halls. This book provides an introduction to ALCs briefly covering their history and then synthesizing the research on these spaces to provide faculty with empirically based practical guidance on how to use these unfamiliar spaces effectively. Among the questions this book addresses are: How can instructors mitigate the apparent lack of a central focal point in the space? What types of learning activities work well in the ALCs and take advantage of the affordances of the room? How can teachers address familiar classroom management challenges in these unfamiliar spaces? If assessment and rapid feedback are critical in active learning, how do they work in a room filled with circular tables and no central focus point? How do instructors balance group learning with the needs of the larger class? How can students be held accountable when many will necessarily have their backs facing the instructor? How can instructors evaluate the effectiveness of their teaching in these spaces? This book is intended for faculty preparing to teach in or already working in this new classroom environment, for administrators planning to create ALCs or experimenting with provisionally designed rooms, and for faculty developers helping teachers transition to using these new spaces.

Life Science (Teacher Guide) Dr. Carl Werner, 2018-05-17 Chapter Discussion Question Teachers are encouraged to participate with the student as they complete the discussion questions. The purpose of the Chapter Purpose section is to introduce the chapter to the student. The Discussion Questions are meant to be thought provoking. The student may not know the answers but should answer with their thoughts, ideas, and knowledge of the subject using sound reasoning and logic. They should study the answers and compare them with their own thoughts. We recommend the teacher discuss the questions, the student's answers, and the correct answers with the student. This section should not be used for grading purposes. DVD Each DVD is watched in its entirety to familiarize the student with each book in the course. They will watch it again as a summary as they complete each book. Students may also use the DVD for review as needed as they complete each chapter of the course. Chapter Worksheets The worksheets are foundational to helping the student learn the material and come to a deeper understanding of the concepts presented. Often the student will compare what we should find in the fossil record and in living creatures if evolution were true with what we actually find. This comparison clearly shows evolution is an empty theory simply based on the evidence. God's Word can be trusted and displayed both in the fossil record and in living creatures. One Priest's Wondering Beliefs John E. Bowers, 2016-09-15

This book is aimed at those Christians who have begun to question the conventional understandings of Jesus and Christianity and even of what we mean by God and have become discomfited by the dissonance between their own thinking and the church's stance A critical thinker by inclination and education Jack Bowers explored Celtic Christian spirituality for a decade That taught him there are other ways to live out the Christian faith than what we have been told by Rome and Protestantism Upon retirement in 1998 no longer professionally required to reflect conventional theology his belief structure began to wander seriously re-examining all he had taught and believed Having heard whispered rumors in younger years of priests losing their faith instead he felt he was not losing his theology but growing it This volume leads you through the evolution of his beliefs to what he can speak out with confidence right now understanding that as he continues to grow and experience this world and hopefully get a little wiser his beliefs will evolve yet farther He invites you into this challenging spiritual pilgrimage to discover what you can confidently believe in 2016 AD
