Integration of Reusable Systems Thouraya Bouabana-Tebibel, Stuart H. Rubin, 2014-02-17 Software reuse and integration has been described as the process of creating software systems from existing software rather than building software systems from scratch Whereas reuse solely deals with the artifacts creation integration focuses on how reusable artifacts interact with the already existing parts of the specified transformation Currently most reuse research focuses on creating and integrating adaptable components at development or at compile time However with the emergence of ubiquitous computing reuse technologies that can support adaptation and reconfiguration of architectures and components at runtime are in demand This edited book includes 15 high quality research papers written by experts in information reuse and integration to cover the most recent advances in the field These papers are extended versions of the best papers which were presented at IEEE International Conference on Information Reuse and Integration and IEEE International Workshop on Formal Methods Integration which was held in San Francisco in August 2013

The Biology and Technology of Intelligent Autonomous Agents Luc Steels, 2012-12-06 The NATO sponsored Advanced Study Institute The Biology and Technology of Intelligent Autonomous Agents was an extraordinary event For two weeks it brought together the leading proponents of the new behavior oriented approach to Artificial Intelligence in Castel Ivano near Trento The goal of the meeting was to establish a solid scientific and technological foundation for the field of intelligent autonomous agents with a bias towards the new methodologies and techniques that have recently been developed in Artificial Intelligence under the strong influence of biology Major themes of the conference were bottom up AI research artificial life neural networks and techniques of emergent functionality The meeting was such an extraordinary event because it not only featured very high quality lectures on autonomous agents and the various fields feeding it but also robot laboratories which were set up by the MIT AI laboratory with a lab led by Rodney Brooks and the VUB AI laboratory with labs led by Tim Smithers and Luc Steels This way the participants could also gain practical experience and discuss in concreto what the difficulties and achievements were of different approaches In fact the meeting has been such a success that a follow up meeting is planned for September 1995 in Monte Verita Switzerland This meeting is organised by Rolf Pfeifer University of Zurich

Agent and Multi-Agent Systems: Technologies and Applications Anne Hakansson, Ronald Hartung, 2009-05-30 This volume contains the proceedings of the Third KES Symposium on Agent and Multi agent Systems Technologies and Applications KES AMSTA 2009 held at Uppsala University in Sweden during June 3 5 2009 The symposium was organized by Uppsala University KES International and its Focus Group on Agent and Multi agent Systems The KES AMSTA Symposium series is a sub series of the KES Conference series Following the successes of the First KES Symposium on Agent and Multi agent Systems Technologies and Applications KES AMSTA 2007 held in Wroclaw Poland from May 31 to 1 June 2007 and the Second KES Symposium on Agent and Multi agent Systems Technologies and Applications KES AMSTA 2008 held in Incheon Korea March 26 28 2008

KES AMSTA 2009 featured keynote talks oral and poster presentations and a number of workshops and invited sessions closely aligned to the themes of the conference The aim of the symposium was to provide an international forum for scientific search into the technologies and applications of agent and multi agent systems Agent and multi agent systems are an innovative type of modern software system and have long been recognized as a promising technology for constructing autonomous complex and intelligent systems A key development in the field of agent and multi agent systems has been the specification of agent communication languages and formalization of ontologies Agent communication languages are intended to provide standard declarative mechanisms for agents to communicate knowledge and make requests of each other whereas ontologies are intended for conceptualization of the knowledge domain

Concrete Structures A. Ghali,R. Favre,M. Elbadry,2020-10-28 This text presents the most effective analysis for predicting the true stresses and deflections of concrete structures accounting for creep and shrinkage of concrete and relaxation of prestressed reinforcement Sustainability has become a major requirement in modern structures which need to sustain satisfactory service over a longer life It is not rare to specify a life span of 100 years for

infrastructure such as bridges This complete and wide ranging study of stresses and deformations of reinforced and prestressed concrete structures focuses on design methods for avoiding the deflections and cracking that diminish serviceability This fourth edition has a new emphasis on designing for serviceability It has been comprehensively updated It now includes 65 solved examples and more than 45 instructive problems with answers given at the end of the book An accompanying website contains design calculation programs which allow interactive data input Independent of codes of practice the book is universally applicable and is especially suitable for practising engineers and graduate students

Case-Based Reasoning Research and Development Hector Munoz-Avila, Francesco Ricci, 2005-09-07 The conference took place during August 23-26 2005 at the downtown campus of DePaul University in the heart of Chicago's downtown **New Advances in Machine Learning** Yagang Zhang, 2010-02-01 The purpose of this book is to provide an up to date and systematic introduction to the principles and algorithms of machine learning The definition of learning is broad enough to include most tasks that we commonly call learning tasks as we use the word in daily life It is also broad enough to encompass computers that improve from experience in quite straightforward ways The book will be of interest to industrial engineers and scientists as well as academics who wish to pursue machine learning The book is intended for both graduate and postgraduate students in fields such as computer science cybernetics system sciences engineering statistics and social sciences and as a reference for software professionals and practitioners The wide scope of the book provides a good introduction to many approaches of machine learning and it is also the source of useful bibliographical information
