Abortion, Execution, and the Consequences of Taking Life James D. Slack,2017-09-08 This book focuses on the relationship between public morality and personal action in the American political community It emphasizes the responsibilities of citizens and government to find and confirm truth looking to specific sources religious scripture and empirical events Recognizing that we have a natural preference for distraction and distance from both sources of truth Slack uses qualitative open ended interviews and direct observation to uncover the intimate consequences of life taking in open societies Abortion and murder capital punishment are instances in which there is a sequence of events that result in life taking The act of murder denies the sanctity of life of someone else Abortion and capital punishment also deny the sanctity of the lives of others The intimacy of life taking is not typically acknowledged or remains hidden This makes it difficult to assess the consequences for victims survivors and the political community as a whole As a result there is only a tenuous link between public actions that question the sanctity of human life and the moral compass professed by the American democracy

The volume presumes a theocentric foundation envisioned by the American Founders. It explores the model's first source of truth: biblical scripture as it applies to the public actions of murder, abortion, and capital punishment. Then it investigates the intimate reality of these acts. These realities are examined in a variety of settings, resulting in a mosaic pattern of public action about capital punishment and abortion. Slack underscores the importance of government's role of providing outward justice as well as the citizen's responsibility to be supportive of government tasks in order to reconcile the reality of life taking with the moral compass professed in the American political community.

Theoretical Principles of Distance Education Desmond Keegan, 2005-08-15. According to UNESCO statistics, 10 million of the world's 600 million students study at a distance. Theoretical Principles of Distance Education seeks to lay solid foundations for the education of these students and for the structures within which they study. As a more industrialised form of education provision, distance education is well adapted to the use of new communication technologies and brings to education many of the strengths and dangers of post-industrialism. The central focus of the study of distance education is the placing of the student at home or at work and the justification of the abandonment in this form of education of interpersonal face-to-face communication previously considered to be a cultural imperative for education in both east and west. This book explores the problems that distance education poses to the theorist, bringing together an international team of distance educators to address these issues for the first time in a systematic way. The team comprises theoreticians, administrators, experts in educational technology, and adult education experts in learning from video machines, from computers, and other forms of technology. Contributions from Italy and Scandinavia contrast with viewpoints provided by scholars from the US, Canada, Australia, and the UK.

Glass Jörn W. P. Schmelzer, 2014-05-21. This book contains overviews on technologically important classes of glasses, their treatment to achieve desired properties, theoretical approaches for the description of structure-property relationships, and new concepts in the theoretical treatment of crystallization in glass-forming systems. It contains overviews about the state of the art and about specific features for the analysis and application of important classes of glass-forming systems and describes new developments in theoretical interpretation by well-known glass scientists. Thus, the book offers comprehensive and abundant information that is difficult to come by or has not yet been made public.

Edgar Dutra Zanotto, Center for Research Technology and Education in Vitreous Materials, Brazil. *Glass*, written by a team of renowned researchers and experienced book authors in the field, presents general features of glasses and glass transitions. Different classes of glass-forming systems, such as silicate glasses, metallic glasses,

and polymers are exemplified In addition the wide field of phase formation processes and their effect on glasses and their properties is studied both from a theoretical and experimental point of view *The Space Between Us* Ryan D. Enos,2017

The Space Between Us brings the connection between geography psychology and politics to life By going into the neighborhoods of real cities Enos shows how our perceptions of racial ethnic and religious groups are intuitively shaped by where these groups live and interact daily Through the lens of numerous examples across the globe and drawing on a compelling combination of research techniques including field and laboratory experiments big data analysis and small scale interactions this timely book provides a new understanding of how geography shapes politics and how members of groups think about each other Enos analysis is punctuated with personal accounts from the field His rigorous research unfolds in accessible writing that will appeal to specialists and non specialists alike illuminating the profound effects of social geography on how we relate to think about and politically interact across groups in the fabric of our daily lives Jacket *The Commercial and Financial Chronicle* ,1910 *The New Handbook of Multisensory Processing* Barry E.
