Maloney,2013-09-13 Interest organizations have always assumed a prominent place in European politics because they link states with citizens institutionalize the resolution of social conflicts regulate important sectors of the economy and society contribute to workable policy outcomes and socialize members into democratic politics However the plethora of interest group studies that exist have not consolidated our understanding of these actors These analyses have been subject to the vagaries of different theoretical perspectives and vary greatly in their conceptual and methodological frameworks Consequently a not always complementary and fragmented series of findings has emerged This book is a systematic and comprehensive effort at investigating and integrating the state of the art in European interest group research Combining the analysis of interest group politics in the EU with the comparative study of interest organizations the book seeks to identify the areas about which there is consolidated knowledge that are marked by controversies in which considerable uncertainty exists that have been omitted from research programs and that ought to be part of future studies Thereby it provides a general reflection on how the study of interest group politics can be improved by linking it to the comparative study of governance This book was published as a special issue of *West European Politics* *Governing Health* William G.

Weissert,Carol S. Weissert,2012-07-10 *Governing Health* examines health care policy from a political perspective describing how Congress the president special interest groups bureaucracy and state governments help define health policy problems and find politically feasible solutions William G Weissert and Carol S Weissert provide a highly readable and comprehensive synthesis of political science research on how government and private institutions affect the policy process Extensive reviews of the policies that have governed health care since Lyndon Johnson s administration are capped off with a prognosis for the future Updates to the fourth edition of *Governing Health* include new examples and theory perspectives recent statistics discussion of the 2010 Obama health reform **Ecology and Conservation of the Maned Wolf** Adriana G.

Political Parties and Interest Groups in Norway Elin Haugsgjerd Allern, 2024-10-31 How do today's political parties relate to other organisations Do they prefer rather distant relationships with a wide range of interest groups or have they virtually detached themselves from civil society altogether Scholars seem to agree that traditionally close relationships such as those between social democratic parties and trade unions have grown weaker since the 1960s But to date only limited systematic research has been conducted While parties and interest groups attract a great deal of attention from political scientists the links between them have been largely overlooked This book is an attempt to bridge the gap starting from the party side of the relationship It throws new light on the topic by presenting a theory driven comprehensive study of Norway's seven major political parties and their relationships with interest groups at the beginning of the new millennium Based on original and extensive data including party documents in depth interviews with key players and a survey of national party elites Elin Haugsgjerd Allern paints a nuanced picture of the nature and significance of these relationships and the factors that shape them A major conclusion is that Norway's parties tend to maintain rather distant but wide ranging relationships with interest groups today However some parties still have fairly strong links with their traditional associates and a narrower network of links with other groups Hence Allern also shows that significant differences exist between parties that are apparently exposed to the same social political and institutional environment

Lobbying the New President Heath Brown, 2013-05-02 Presidential transitions offer the chance for new ideas policies and people to inhabit the White House Transitions have triggered policy change for decades and eager interest groups have sought ways to capitalize on this often chaotic phase of US politics President Elect Barack Obama declared that lobbyists would be forbidden from serving his transition and issued stiff regulations and rules to limit their access to the planning for his White House Yet even though Obama's efforts mirror previous Presidents anti lobbyist efforts all Presidential transitions provide certain channels of influence and Obama himself chose the head of a powerful and politically oriented think tank the Center for American Progress to run his transition New Presidents need the information ideas and political capital that groups possess Thus a curious paradox Using an innovative mixed methodology integrating a historical analysis of original documents original interviews with over 40 interest group leaders and transition leaders a survey of 300 interest groups and content analysis of 300 interest group letters Lobbying the New President uncovers the politics of interest group influence during Presidential transitions In doing so Heath Brown asks Was the role played by Heritage in 1980 and CAP in 2008 indicative of

a pattern of influence during the transition phase Or have Presidents effectively shielded themselves from outside influence at the earliest point of their time in office What can we learn about the larger study of interest groups and the Presidency from a focus on the transition phase This book is a valuable resource that goes beyond the field of presidency studies which American politics scholars as well as public policy specialists should not go without *Everyday Activism* Michael R.
