MOP Connection: Refraction and Lenses: sublevels 1 and 2

- Write a one-word synonym for **refraction**. _____
- Refraction occurs when light crosses the boundary between one material and another material. What is the primary cause for this refracting of light upon crossing a boundary?

The diagram below shows the path of a light ray as it travels through air, across the air-water boundary, and through the water. Use the diagram to answer questions #3-#6.

- On the diagram, label ____
 - the air-water boundary with a **B**
 - the normal line with an **N**
 - the incident ray with an **I**
 - the refracted ray with an **R**
 - the angle of incidence with a θ_i
 - the angle of refraction with a θ_r
- How many media are there in this diagram? ____
Name them.

- What is meant by the term "medium" in this context?
- Place a noticeable dot at the location where refraction of light takes place.
- For the three situations below, draw a normal line and measure and record the angles of incidence and the angles of refraction.

$\theta_i =$ _____

$\theta_r =$ _____

$\theta_i =$ _____

$\theta_r =$ _____

$\theta_i =$ _____

$\theta_r =$ _____

- As light passes from one medium into another, it refracts. There is only one condition in which light will cross a boundary but not refract. State this condition.

Challenging Prior Views of Teaching and Learning S.M. Bullock, 2011-07-23 Learning to teach is complex Teacher candidates begin a preservice program with powerful tacit assumptions about how teachers teach based on lengthy apprenticeships of observation over many years as students Virtually all teacher education programs provide a mixture of coursework and classroom experience Much has been written about the theory into practice approach in teacher education an approach that assumes teacher candidates who have been provided with instructions about how to teach will be able to recall and apply them in a school setting In reality teacher candidates report considerable difficulty enacting theory in practice to the point that many question the value of coursework This book takes an in depth look at five future teachers in one teacher education program analyzing and interpreting how they and their teacher educators learn from experience during both coursework and practicum experiences Many assumptions about the complex challenges of teaching teachers are called into question Is the role of a teacher educator to synthesize research based best practices for candidates to take to their field placements Does the preservice practicum experience challenge or reinforce a lifetime of socialized experiences in schools Must methods courses always be seen by most teacher candidates as little more than sites for collecting resources Where and how do candidates construct professional knowledge of teaching The data illustrate clearly that methods courses can be sites for powerful learning that challenges tacit assumptions about how and why we teach *John Dewey and the Challenge of Classroom Practice* Stephen M. Fishman, Lucille Parkinson McCarthy, 1998 The first systematic exploration of Deweyan pedagogy in an actual classroom since studies of Dewey's own Laboratory School at the turn of the century In Part I using accessible language Stephen Fishman discusses Dewey's educational theory in the context of Dewey's ideology and process philosophy In Part II Fishman joins composition specialist Lucille McCarthy to examine his own Introduction to Philosophy class In doing so the authors model a collaborative form of practitioner inquiry and bring to life such complex Deweyan concepts as student curriculum integration interest and effort and continuity and interaction **Project STAR**, 2001

The Nature of Technology Michael P. Clough, Joanne K. Olson, Dale S Niederhauser, 2013-09-03 How does technology alter thinking and action without our awareness How can

instantaneous information access impede understanding and wisdom How does technology alter conceptions of education schooling teaching and what learning entails What are the implications of these and other technology issues for society Meaningful technology education is far more than learning how to use technology It entails an understanding of the nature of technology what technology is how and why technology is developed how individuals and society direct react to and are sometimes unwittingly changed by technology This book places these and other issues regarding the nature of technology in the context of learning teaching and schooling The nature of technology and its impact on education must become a significant object of inquiry among educators Students must come to understand the nature of technology so that they can make informed decisions regarding how technology may influence thinking values and action and when and how technology should be used in their personal lives and in society Prudent choices regarding technology cannot be made without understanding the issues that this book raises This book is intended to raise such issues and stimulate thinking and action among teachers teacher educators and education researchers The contributions to this book raise historical and philosophical issues regarding the nature of technology and their implications for education challenge teacher educators and teachers to promote understanding of the nature of technology and provide practical considerations for teaching the nature of technology
