Transforming the Internal World and Attachment Geoff Goodman,2010 Transforming the Internal World and Attachment reviews and discusses four theories about what makes psychotherapy effective across forms of treatment treatment settings and diagnostic categories mindfulness mentalization psychological mindedness and the attachment relationship Geoff Goodman offers some provisional hypotheses about therapeutic effectiveness and suggests some ways of testing these hypotheses empirically using sophisticated assessment instruments that measure psychotherapy process and outcome Managed care companies are withholding reimbursements for treatments not considered empirically supported Instead of engaging in horse races with randomized controlled trials RCTs Goodman suggests that we need to establish an empirical basis for the therapeutic effectiveness of all forms of treatment move beyond examining common factors such as the therapeutic alliance and turn our collective attention to common factors that psychotherapy researchers often erroneously promote as specific factors Perhaps these so called specific factors produce therapeutic change regardless of the brand name treatment packages through which they are typically delivered

These specific factors might also work better for particular groups of patients with specific problem areas such as affect dysregulation and impulsivity In Volume I Goodman explores the empirical and clinical bases of these specific factors and outlines their various influences on psychotherapy process and outcome

Cognitive-Behavioral Therapy Adam M. Volungis,2018-08-10 Cognitive Behavioral Therapy Theory into Practice provides a formal translation of CBT theory in practice by addressing how to apply core competencies for therapists psychologists serving mental health clients This book is designed for graduate students in training and mental health professionals who want to learn the basic foundations of applied CBT but it is also an invaluable resource for experienced practitioners looking to improve their skills Adam M Volungis reviews the most common and pertinent CBT skills necessary for most clients encountered in practice from establishing a sound therapeutic alliance and structuring sessions to modifying negative automatic thoughts and behavioral exposure Each skill is first presented with a sound evidence based rationale and then followed by specific steps Most of the CBT skills covered are accompanied by therapist client therapy dialogue vignettes and many hours of supplemental videos worksheets for clinical use and PowerPoints which can be accessed on the companion website Each chapter also includes discussion questions and activities that provide the opportunity for students to practice each CBT skill individually or with peers while tables and figures conceptualize and summarize key themes and skills
