Overview

The S541.RF is a radio frequency (RF) transmitter designed to function as a battery powered switch monitor for use in the INNCOM RF IRAS network. It can also be used in conjunction with virtually any "dry contact" switch input to transmit closure information to the e4 thermostat.

The RT3 (S541.RFT), a modified S541.RF, comes equipped with a temperature sensor and dispenses with the wiring harness for use as a low-cost remote battery operated temperature measurement device only.
