is to generate evidence regarding what design is in STEM education For example is the ability to design a singular or manifold construct Is the capacity to design or are factors of this ability both learnable and teachable How transferable is designerly knowledge between contexts How do different disciplinary contexts influence the interpretation of design The second is to further our understanding of how best to incorporate design within STEM education contexts For example how much emphasis should be placed on learning to or through design in school How should design be assessed within formal education Where and when is design best incorporated into education In posing these questions the goal of this research topic is to provide scholarly discourse which supports critical reflection and the challenging of assumptions regarding design in education
