The implications of best practice event management when applied to small-scale local events Sven Damm, 2010-05-27 Inhaltsangabe Abstract Event management is a ubiquitous word in modern society The word is used for small business breakfasts large corporate shows and also for big international sport events such as the Olympic Games We all have an idea of what management is but what is an event An event is often described as something that happens and therefore in that sense we could use the term event management to describe the organisation of everything that happens Getz defines an event as an occurrence at a given place a special set of circumstances a noteworthy occurrence and this definition embraces a wide range of possibilities with one important thing in common they can only occur once As such one key characteristic of events is that they are not continuous for they each have a beginning and an end and every event is different from the last one No matter how hard one tries it is literally impossible to replicate an event thus when watching the Olympic Games we do not see the same picture repeating itself every four years for the event changes and evolves over time Consequently to fully understand how things happen within any given event it is necessary to get involved in the planning and execution of an event Malhotra writes that events are an important aspect of human life and that our understanding of them is poorly developed He thinks that there is a need to enhance the understanding of the subject and this opinion is supported by the relative youth of academic study into the topic In their book Festival Special Event Management Allen O Toole Harris and McDonnell 2008 date the birth of the industry to the 1980s where several seminal events set the pattern for the contemporary event industry as we know it today

Thus especially compared with other disciplines in the field of social science event management is a young discipline and there is not yet a huge base of research to work with In addition rather than academically rigorous research conducted by professional researchers much of the knowledge in the field has been generated by practising event managers who have written books about their own experiences knowledge and skills It is of no surprise that these practitioners and the events they discuss tend to reflect the planning of the biggest events the earth has seen such as the Olympic Games and US presidential inaugurations These authors possess a great deal of experience and Festival & Special Event Management, Essentials Edition Johnny Allen,Robert Harris,Leo Jago,2022-05-23 Allen s Festival and Special Event Management Essentials Edition serves as a concise yet comprehensive step by step handbook for modern event management This Essentials edition gives students contemporary lessons and insights that they can relate to It brings theory to life through copious practical examples illustrative diagrams and unique case studies demonstrating best practices and pitfalls Industry experts from across APAC s event planning sector have contributed content to key contemporary topics including sustainability risk management project management and strategic alignment to client goals This edition also features Wiley s Future Student Guide a unique tool which provides expert and practical advice on career preparedness making for more future ready graduates

Event Management Greg Damster,Dimitri Tassiopoulos,2005 Dealing with event management in developing countries specifically South Africa this textbook confronts the specific challenges of creating well run events in places where world class catering and party supplies are not as readily available as in developed nations Complete with advice about all aspects of managing an event the second edition incorporates additional graphs tables and photographs as well as new material about the legal aspects of event planning

Research Methods in Tourism, Hospitality and Events Management Paul Brunt,Susan Horner,Natalie Semley,2017-09-27 In Research Methods in Tourism Hospitality and Events Management the authors use a step by step approach to guide students through the whole research process from initial ideas through to writing up and presenting the findings Coverage of the Internet and the digital environment as a space to carry out research has been included and the use of technology in analysis such as SPSS NVivo and Qualtrics is covered alongside the more traditional by hand methods Hints tips exercises as well as end of chapter case studies demonstrate real challenges and practical examples from a variety of settings to help students understand how to manage and present their own research The book is complemented by examples of tourism destinations from Spain Switzerland Italy and India and a selection of PowerPoint slides for lecturers Suitable for undergraduate and foundation degree students undertaking a research project in Tourism Hospitality or Events Management
