Edge,2012-12-06 How to Use This Book The primary purpose of this book is to assist small companies involved in both  
hardware and software to devise and evolve their own quality systems There are a number of national and now international  
standards which outline the activities for which procedures and records need to be specified They are described and  
compared in Chapter 2 and the subsequent guidance in the book is intended to assist in meeting them Although at first sight  
the operations of a hardware equipment developer may seem very different from those of a software house the basic  
requirements of a quality system such as the BS 5750 and ISO 1987 series of documents are the same For this reason the  
same standard can be called for in both areas and it will be seen in Part 2 that suitable procedures can be derived to meet  
both types of operation Quality standards BS 5750 AQAP ISO 9000 series distinguish between companies carrying out on the  
one hand both design and manufacturing fixed functions and on the other hand those who only manufacture to specifications  
In practice the lesser requirements those applying to manufacture to fixed specifications are common to both levels of  
standard and the additional controls pertaining to design are added to obtain the higher standard Chapter 2 explains the  
differences in detail      *National Voluntary Laboratory Accreditation Program* ,1994      A Laboratory Quality Handbook of
