

## SAMPLE FOR PHD

# STATEMENT OF PURPOSE

It's hard to believe that little more than a century ago, even in the United States, infectious diseases ran rampant, responsible for hundreds of thousands of deaths. When I was in seventh grade, I was assigned to do a research project on consumption, which I later learned was the name given to modern-day tuberculosis. Through this project, I learned about not only many other types of infectious diseases that have all but been eradicated, as well as their pathophysiological symptoms. It piqued my interest, and I have been ardently pursuing studies in biological sciences ever since.

Due to my interest in pathology and infectious disease, I worked in the lab of Dr. Herbert Holsted during my undergraduate studies. As part of his lab, I tested patient blood samples for the presence of antibodies and helped to develop lower-cost treatment options using purified patient sera. My goal was not only to learn more about immunity to the disease, but also to translate that into something that could be used to treat patients. Such translational work is what I hope to continue to do in the future, and is the reason why I am applying to this PhD program.

My goal is to become a researcher at an academic institution, where I can manage my own laboratory and conduct cutting-edge work in infectious disease control and treatment. This PhD will not only provide me with the biological knowledge and technical training that I will need, but will also hone my scientific thinking skills and broaden my perspective of the field. I look forward to working and collaborating with my peers, building a network of professionals which will prove invaluable in future research. This PhD will equip me for my future career as a researcher, and enable me to do work that can contribute to the good of the whole world.
