*Facing Infinity* Jonas Enander,2025-09-09 A fresh fascinating up to the moment appraisal of black holes the massive astronomical objects with a gravitational pull so strong nothing can escape them not even light that situates them at the center of our understanding of our place on Earth and of the universe Humanity s relationship with black holes began in 1783 in a small English village when clergyman John Michell posed a startling question What if there are objects in space that are so large and heavy that not even light can escape them Almost 250 years later in April 2019 scientists presented the first picture of a black hole Profoundly inspired by that image physicist Jonas Enander has traveled the world to investigate how our understanding of these elusive celestial objects has evolved since the days of Michell With the particular goal of

discovering our human connection to black holes Enander visits telescopes and observatories delves deeply into archives and interviews over 20 world leading experts including several Nobel laureates With Facing Infinity he takes us on a spellbinding journey into the universe s greatest mystery deciphers the most mind bending science and answers questions surrounding how black holes work where they come from and what role they play in the universe Along the way Enander discovers how our desire to understand black holes inadvertently paved the way for the invention of Wi Fi and the calibration of our global navigation satellites how astronomical discovery became entangled with colonial conflicts and how our looking outward gave us critical evidence of the impact of climate change Facing Infinity helps us appreciate and understand as never before these mysterious celestial objects and our surprising connections to them
