Demeulemeester, Willy S. Herroelen, 2006-04-11 Our objectives in writing Project Scheduling A Research Handbook are threefold 1 Provide a unified scheme for classifying the numerous project scheduling problems occurring in practice and studied in the literature 2 Provide a unified and up to date treatment of the state of the art procedures developed for their solution 3 Alert the reader to various important problems that are still in need of considerable research effort Project Scheduling A Research Handbook has been divided into four parts Part I consists of three chapters on the scope and relevance of project scheduling on the nature of project scheduling and finally on the introduction of a unified scheme that will be used in subsequent chapters for the identification and classification of the project scheduling problems studied in this book Part II focuses on the time analysis of project networks Part III carries the discussion further into the crucial topic of scheduling under scarce resources Part IV deals with robust scheduling and stochastic scheduling issues Numerous tables and figures are used throughout the book to enhance the clarity and effectiveness of the discussions For the interested and motivated reader the problems at the end of each chapter should be considered as an integral part of the presentation

Risk Assessment Technologies, and Transportation, Storage, and Disposal of Radioactive Materials F. L. Cho, R. S. Hafner, 1998 Proceedings of a symposium which was a by product of the July 1998 Conference Twenty five contributions deal with technological innovations and with their implementation in such areas as estimating human error probabilities hazard analysis treating PRA source data developing risk informed service inspections safety and reliability analyses and environmental safety level assessment Most of the papers in the section on risk assessment technologies deal with the combination method of probabilistic considerations and fuzzy measures on many disastrous phenomena of some risk significance The discussions of transportation storage and disposal of radioactive materials address engineering and regulatory issues Contains an author index but no subject index Annotation copyrighted by Book News Inc Portland OR

Image Processing and GIS for Remote Sensing Jian Guo Liu, Philippa J. Mason, 2016-03-21 Following the successful publication of the 1st edition in 2009 the 2nd edition maintains its aim to provide an application driven package of essential techniques in image processing and GIS together with case studies for demonstration and guidance in remote sensing applications The book therefore has a 3 in 1 structure which pinpoints the intersection between these three individual disciplines and successfully draws them together in a balanced and comprehensive manner The book conveys in depth knowledge of image processing and GIS techniques in an accessible and comprehensive manner with clear explanations and conceptual illustrations used throughout to enhance student learning The understanding of key concepts is always emphasised with minimal assumption of prior mathematical experience The book is heavily based on the authors own research Many of the author designed image processing techniques are popular around the world For instance the SFIM

technique has long been adopted by ASTRIUM for mass production of their standard Pan sharpen imagery data The new edition also includes a completely new chapter on subpixel technology and new case studies based on their recent research

Essential Image Processing and GIS for Remote Sensing Jian Guo Liu, Philippa J. Mason, 2013-04-10 *Essential Image Processing and GIS for Remote Sensing* is an accessible overview of the subject and successfully draws together these three key areas in a balanced and comprehensive manner The book provides an overview of essential techniques and a selection of key case studies in a variety of application areas Key concepts and ideas are introduced in a clear and logical manner and described through the provision of numerous relevant conceptual illustrations Mathematical detail is kept to a minimum and only referred to where necessary for ease of understanding Such concepts are explained through common sense terms rather than in rigorous mathematical detail when explaining image processing and GIS techniques to enable students to grasp the essentials of a notoriously challenging subject area The book is clearly divided into three parts with the first part introducing essential image processing techniques for remote sensing The second part looks at GIS and begins with an overview of the concepts structures and mechanisms by which GIS operates Finally the third part introduces Remote Sensing Applications Throughout the book the relationships between GIS Image Processing and Remote Sensing are clearly identified to ensure that students are able to apply the various techniques that have been covered appropriately The latter chapters use numerous relevant case studies to illustrate various remote sensing image processing and GIS applications in practice

Ciazynski, W. Ciążyński, Edward Hryniewicz, P. Kłosowski, 2002 Scientific meetings on programmable devices and systems began in 1995 with the PDS 95 event organised by the Institute of Electronics Silesian University of Technology SUT Many papers on the issues of programmable devices and systems were presented at numerous conferences and workshops devoted to electronics and circuit theory yet there were no workshops devoted solely to those particular topics Combined with the belief that some specific common problems appeared in the area of PDS justified the decision to organise the PDS meeting The PDS2001 IFAC Workshop organised by the Institute of Electronics SUT Gliwice Poland was the 5th event in the series The aim of the meeting was to define the future trends of this field via the interaction of industry technical research centres and academia representatives This Proceedings volume contains 54 duly presented

papers and many of them when compared to the Preprints volume version have been corrected and enriched with the discussion results The papers are grouped according to the Workshop plenary sessions topics as follows
