Canadian Forest Industries ,1987 **Green Chemical Syntheses and Processes** Paul T. Anastas,Lauren G.

Heine,Tracy C. Williamson,2000 There have been a number of recent advances in the area of green chemistry This book contains some of the notable breakthroughs that have marked this science that is designed to reduce or eliminate the use and generation of hazardous substances It addresses how recent advances in biocatalysis and biosynthesis can be used to make traditional chemical transformations more environmentally benign or alternately how it is inventing and discovering new chemical transformations that are intrinsically less hazardous The new uses of known solvent systems as well as the exploration of new solvent systems is discussed in the context of its benefits both in terms of efficiency and environmental benefit The area of designing safer chemicals provides some recent examples of how molecules as diverse as pesticides and dyes can be made more environmentally benign This volume is part of a two volume set devoted to promoting the concept of green chemistry Each of these volumes will facilitate more widespread adoptions of these techniques by governments and chemical industry and lead to a greater overall understanding of green chemistry **September 2022 - Surplus Record**
