Student Exploration: Populations and Samples

Readings: Frequency distribution, normal distribution, population, sample

Prior Knowledge Questions (What do you already know about this topic?)

a. **Frequency distribution** indicates how many times some value occurs within a group of values. Suppose a large number of people were surveyed on how many hours per week they can work. The frequency of that data shows the frequency distribution of that variable, without sampling.

b. How would you approximate shape of the distribution?

c. As the curve grows in height, which value gets closer to frequency distribution might also shift the same people could change the number before reaching the top.

Classroom Activity

In many cases, a frequency distribution is approximately normal. However, if the distribution is skewed, it is not normal. For example, if the distribution is skewed, it is not normal. For example, if the distribution is skewed, it is not normal. For example, if the distribution is skewed, it is not normal.

a. The normal distribution is the standard approximation of the frequency distribution described above. It is a normal distribution with a mean of 40 and a standard deviation of 10. The normal distribution is the standard approximation of the frequency distribution described above. It is a normal distribution with a mean of 40 and a standard deviation of 10.

b. About the simulation, specify the number of the data (the data) to start with sampling from a distribution. (the data) when the sample size is about 10.

i. What is the mean of each sample? (the mean) _____ the mean _____
