Future-Ready Teaching With AI Aaron Blackwelder, Jason Cowley, 2024-12-18 Prepare your students for a future where AI literacy is crucial. Artificial intelligence (AI) is here and seems on the brink of transforming education. As teachers, we know that AI will not diminish the need for students to learn essential skills. It will, however, change how we teach and will require us to develop new skill sets for instruction and assessment. Teachers have a new opportunity to embrace future-ready instruction that prepares students to engage in a world that expects them to be AI-literate. In *Future Ready Teaching With AI: Unlocking Student Potential in the Age of Artificial Intelligence*, authors Aaron Blackwelder and Jason Cowley explore the integration of AI in the classroom and its potential to revolutionize teaching. Much more than simply a book about using AI tools, this rich resource aims to help teachers raise rigor, increase engagement, and promote more meaningful learning opportunities in their classrooms as they embrace the future of teaching and learning. Offering evergreen principles and strategies to help educators navigate the age of AI, this book encourages critical thinking about the ethical use of AI to foster conversations with students. Highlights various practical tools that can help teachers meet diverse student learning needs as well as create AI-proof assignments. Includes chapter vignettes, sample AI prompts, activities, reflective questions, and links to online resources to support teachers' work in the classroom. Examines how to leverage AI to streamline rudimentary tasks such as lesson planning, assessment, and differentiation, allowing teachers to focus on building relationships, providing feedback, and personalizing learning for their students. Written by two secondary teachers, this book is an essential resource for K-12 teachers and administrators looking to move beyond the basics of using AI. By equipping educators to become leaders in this transformation, *Future Ready Teaching With AI* demonstrates how to harness the power of AI to help every student thrive. **Ri Irg Act of Teaching**

The ideology impoverishing education in America and how we can do better for our students](#) Daniel Buck, 2022-12-09 What is wrong with our schools is the question everyone seems to be asking, or more like screaming nowadays. Standard answers point to everything from school funding to unions to bureaucracies and more. In this book, Daniel Buck provides a different answer: flawed ideas about instruction, curriculum,

even human nature itself are the root cause of American schooling's dysfunction. Touching on philosophy, contemporary educational studies, cognitive science, and his own experience in the classroom, Buck argues that so long as we build our system on incorrect first principles, all other reforms are for naught. In place of the progressive education that pervades our schools, Buck argues for a traditionalist approach: classic literature, direct instruction, sequenced curricula, clear rules and consequences as the education we need for the future.

From art and physical education to science and social studies, schools can make good on their promise, and this book will show you how. Join Stuart in this personable journey by tackling student motivation through The Five Key Beliefs: of credibility, value, effort, efficacy, and belonging. Ten strategies for incorporating the Five Key Beliefs into everyday teaching. Common struggles for each strategy and how to overcome them. A companion website with additional resources, videos, and downloadables. Do the work. Do it with care.
