Stuck in the Shallow End, updated edition Jane Margolis, 2017-02-24 Why so few African American and Latino students study computer science updated edition of a book that reveals the dynamics of inequality in American schools The number of African Americans and Latino students receiving undergraduate and advanced degrees in computer science is disproportionately low And relatively few African American and Latino high school students receive the kind of institutional encouragement educational opportunities and preparation needed for them to choose computer science as a field of study and profession In *Stuck in the Shallow End* Jane Margolis and coauthors look at the daily experiences of students and teachers in three Los Angeles public high schools an overcrowded urban high school a math and science magnet school and a well funded school in an affluent neighborhood They find an insidious virtual segregation that maintains inequality The race gap in computer science Margolis discovers is one example of the way

students of color are denied a wide range of occupational and educational futures Stuck in the Shallow End is a story of how inequality is reproduced in America and how students and teachers given the necessary tools can change the system Since the 2008 publication of Stuck in the Shallow End the book has found an eager audience among teachers school administrators and academics This updated edition offers a new preface detailing the progress in making computer science accessible to all a new postscript and discussion questions coauthored by Jane Margolis and Joanna Goode Stuck in the Shallow End Jane Margolis, 2008-08-15 The number of African Americans and Latino as receiving undergraduate and advanced degrees in computer science is disproportionately low according to recent surveys And relatively few African American and Latino high school students receive the kind of institutional encouragement educational opportunities and preparation needed for them to choose computer science as a field of study and profession In Stuck in the Shallow End Jane Margolis looks at the daily experiences of students and teachers in three Los Angeles public high schools an overcrowded urban high school a math and science magnet school and a well funded school in an affluent neighborhood She finds an insidious virtual segregation that maintains inequality Two of the three schools studied offer only low level how to keyboarding cutting and pasting introductory computing classes The third and wealthiest school offers advanced courses but very few students of color enroll in them The race gap in computer science Margolis finds is one example of the way students of color are denied a wide range of occupational and educational futures Margolis traces the interplay of school structures such factors as course offerings and student to counselor ratios and belief systems including teachers assumptions about their students and students assumptions about themselves Stuck in the Shallow End is a story of how inequality is reproduced in America and how students and teachers given the necessary tools can change the system Books In Print 2004-2005 Ed Bowker Staff, Staff Bowker, Ed, 2004 **Dismantling Contemporary Deficit Thinking** Richard R. Valencia, 2010-09-13 Deficit thinking is a pseudoscience founded on racial and class bias It blames the victim for school failure instead of examining how schools are structured to prevent poor students and students of color from learning Dismantling Contemporary Deficit Thinking provides comprehensive critiques and anti deficit thinking alternatives to this oppressive theory by framing the linkages between prevailing theoretical perspectives and contemporary practices within the complex historical development of deficit thinking Dismantling Contemporary Deficit Thinking examines the ongoing social construction of deficit thinking in three aspects of current discourse the genetic pathology model the culture of poverty model and the at risk model in which poor students students of color and their families are pathologized and marginalized Richard R Valencia challenges these three contemporary components of the deficit thinking theory by providing incisive critiques and discussing competing explanations for the pervasive school failure of many students in the nation s public schools Valencia also discusses a number of proactive anti deficit thinking suggestions from the fields of teacher education educational leadership and educational ethnography that are intended to provide a more equitable and democratic schooling

for all students
