2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007/09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition

Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

South Asian Economic Development Moazzem Hossain,Rajat Kathuria,Iyanatul Islam,2010 South Asia s developing nations have been enjoying moderate to high growth over the past decade before the global recession began This new edition provides an up to date guide to the growing markets in South Asia It offers an analysis of the changes and consequences of high sustainable growth investigating what has been achieved in the region during the last ten years from a macroeconomic viewpoint identifying new challenges and clearly defining what has driven the boom The first part of the textbook presents an analysis of how South Asia is rated against Southeast and East Asia in recent decades in economic and social terms The second part of the text focuses on South Asia s economic development over 1990s and mid 2000s and the third and final part identifies those major governance issues which were responsible for South Asia s underperformance both socially and economically It is widely recognised that globalisation enhanced global trade and that trade further increased the region s prosperity Embracing the view that economists can no longer regard themselves as technocratic guardians of neutral policy advice the book advocates for a shift in focus from policy reform per se to the more challenging task of implementing institutional reform that will invigorate the capability of the political leadership to bring about rapid sustained and poverty reducing growth in South Asia The central task would be to re direct the focus of governments in South Asia in order to ensure that the core functions of the state stable non distortionary policy climate a secure foundation of law investment in basic education health and infrastructure protection of the vulnerable and adapting with the climate change are efficiently provided At the same time the reform agenda must be sensitive to the goal of ensuring that durable democratic institutions traditions and values are preserved This is a fundamental challenge but one that must be met in order to secure the emergence of a prosperous South Asia in the early part of the twenty first century This textbook will be useful for students and researchers in Development Economics Business Economics Development Studies and Asian Studies

Global Vessel-Source Maritime Pollution Governance—Technical Innovation and Policy Orientation Lang Xu,Zheng Wan,Jihong Chen,2023-09-25 The maritime industry plays an important role in international trade activities and the global economy It is estimated that international shipping carries approximately 80% of global trade by volume and more than 70% by value However increasing maritime

activities have had a negative impact on the marine environment and human health For example in November 2002 a tanker carrying 77000 tons of fuel oil sank in the Bay of Biscay which polluted thousands of kilometers of Western European coasts rivers streams and swamps Oil spills caused by ship accidents and other pollution associated with maritime activities have attracted considerable attention in the research community A large number of studies on shipping pollution have been conducted across different disciplines However new challenges are emerging in maritime operation and management leading to research questions related to intelligent technology and environmental protection maritime pollution and governance maritime accidents and environmental emergency
