Aristotle's Empiricism Jean De Groot, 2014-02-05 In Aristotle's Empiricism Jean De Groot argues that an important part of Aristotle's natural philosophy has remained largely unexplored and shows that much of Aristotle's analysis of natural movement is influenced by the logic and concepts of mathematical mechanics that emerged from late Pythagorean thought. De Groot draws upon the pseudo-Aristotelian Physical Problems XVI to reconstruct the context of mechanics in Aristotle's time and to trace the development of kinematic thinking from Archytas to the Aristotelian Mechanics. She shows the influence of kinematic thinking on Aristotle's concept of power or potentiality which she sees as having a physicalistic meaning originating in the problem of movement. De Groot identifies the source of early mechanical knowledge in kinesthetic awareness of mechanical advantage showing the relation of Aristotle's empiricism to more ancient experience. The book sheds light on the classical Greek understanding of imitation and device as it questions both the claim that Aristotle's natural philosophy codifies opinions held by convention and the view that the cogency of his scientific ideas depends on metaphysics.

Edinburgh Companion to Twentieth-Century Philosophies Constantin V. Boundas, 2007-06-19 *The Companion* is organized into two sections each one of which reflects the developments of the Anglo-American Analytic and the Continental European philosophical traditions respectively. An appendix presents the main accomplishments of non-Western philosophies in the same time frame. Each section discusses the main movements and fields of the discipline throughout the century. The authors have maintained a balance between the historian's commitment to breadth and accuracy with the commitment of the systematic philosopher to the engaged point of view and to critical reflection. The result is a distinctive reference book made up of a series of philosophical studies, an invaluable companion to anyone who is searching for a panoramic but also reliable and challenging presentation of the philosophical ideas which shaped the last century.
