

Year 5 Science & Technology Unit 2020

Earth and Space

Term:	One & Two	Duration:	15 weeks	Grade:	Five	Year:	2020
-------	-----------	-----------	----------	--------	------	-------	------

UNIT OVERVIEW

OUTCOMES

This unit focuses on Earth's place in the solar system, changes on its surface caused by natural disasters and the exploration of how these may be mitigated. Learning experiences in this unit further develop students' understanding of the Earth, its position in the solar system and as a dynamic part of a complex, interrelated system.

ST3-1WS-5 Working Scientifically
plans and conducts scientific investigations to answer testable questions, and collects and summarises data to communicate conclusions.

ST3-10ES-5 Earth and Space
explains regular events in the solar system and geological events on the Earth's surface

SKILLS FOCUS

ASSESSMENT

Working Scientifically

Processing and analysing data

- Construct and use a range of representations, including tables and graphs, to represent and describe observations, patterns or relationships in data
- Employ appropriate technologies to represent data
- Compare data with predictions
- Present data as evidence in developing explanations

Communicating

- Communicate ideas, explanations and processes, using scientific representations including multimodal forms

Design & Production

Researching and planning

- research, identify and define design ideas and processes for an audience
- consider functional and aesthetic needs in planning a design solution
- develop, record and communicate design ideas, decisions and processes using appropriate technical terms
- produce labelled and annotated drawings including digital graphic representations for an audience
- consider sustainability of resources when researching and planning design solutions
- manage projects within time constraints

Assessment: *For* *As* *Of* Learning

- ☐ Revolution, Rotation, Orbit Explanation ([Assessment For Learning](#))
- ☐ Planets of the solar systems research task ([Assessment For Learning](#))
- ☐ Reflection on robotics challenge ([Assessment As Learning](#))
- ☐ Natural disaster research task ([Assessment For Learning](#)) and system prototype ([Assessment Of Learning](#))

Planet Earth Units Of Work:

Mathematical Models and Methods for Planet Earth Alessandra Celletti, Ugo Locatelli, Tommaso Ruggeri, Elisabetta Strickland, 2014-03-05 In 2013 several scientific activities have been devoted to mathematical researches for the study of planet Earth. The current volume presents a selection of the highly topical issues presented at the workshop Mathematical Models and Methods for Planet Earth held in Roma, Italy, in May 2013. The fields of interest span from impacts of dangerous asteroids to the safeguard from space debris, from climatic changes to monitoring geological events, from the study of tumor growth to sociological problems. In all these fields, the mathematical studies play a relevant role as a tool for the analysis of specific topics and as an ingredient of multidisciplinary problems. To investigate these problems, we will see many different mathematical tools at work: just to mention some, stochastic processes, PDE normal forms, chaos theory. **Collected Works of Velimir Khlebnikov: Letters and theoretical writings** Велимир Хлебников, 1987 Dubbed by his fellow Futurists the King of Time, Velimir Khlebnikov (1885-1922) spent his entire brief life searching for a new poetic language to express his convictions about the rhythm of history, the correspondence between human behavior and the language of the stars. The result was a vast body of poetry and prose that has been called hermetic, incomprehensible, even deranged. Of all this tragic generation of Russian poets, including Blok, Esenin, and Mayakovsky, Khlebnikov has been perhaps the most praised and the more censured. This first volume of the Collected Works, an edition sponsored by the Dia Art Foundation, will do much to establish the counterimage of Khlebnikov as an honest, serious writer. The 117 letters published here for the first time in English reveal an ebullient, humane, impractical but deliberate working artist. We read of the continuing involvement with his family throughout his vagabond life; pleas to his smartest sister Vera to break out of the mold; pleas to his scholarly father not to condemn and to send a warm overcoat; the naive pleasure he took in being applauded by other artists; his insistence that a young girl's simple verses be included in one of the typically outrageous Futurist publications of the time; his jealous fury at the appearance in Moscow of the Italian Futurist Marinetti; a first draft of his famous zoo poem "O Garden of Animals"; his seriocomic but ultimately shattering efforts to be released from army service; his inexhaustibly courageous confrontation with his own disease and excruciating poverty; and always his deadly earnest attempt to make sense of numbers, language, suffering, politics, and the exigencies of publication. The theoretical writings presented here are even more important than the letters to an understanding of Khlebnikov's creative output. In the scientific articles written before 1910, we discern foreshadowings of major patterns of later poetic work. In the pan-Slavic proclamations of 1908-1914, we find explicit connections between cultural roots and linguistic ramifications. In the semantic excursions beginning in 1915, we can see Khlebnikov's experiments with consonants, nouns, and definitions spelled out in accessible, if arid, form. The essays of 1916-1922 take us into the future of Planet Earth: visions of universal order and accomplishment that no longer seem so far-fetched but indeed resonate for modern readers. **Our mission to planet earth: a guide to teaching Earth system science.** ,
