APAIS 1994: Australian public affairs information service, *A Gaffer's Perspective on Independent Filmmaking* Rick M. Lord, 2011 In today's digital age, thousands and thousands of independent filmmakers are challenging Hollywood's elite best of the best film producers. *A Gaffer's Perspective on Independent Filmmaking* examines why so many first-time independent film productions are doomed to failure before the first day of principal photography ever begins. Learning what dooms a production is only half of the process; teaching successful practices and techniques while revealing many of the tricks of the trade used by the big productions is the other half. With examples of actual productions gone awry combined with should-haves, this book is a must-have for a successful filmmaking experience.

Encyclopedia of Film Noir Geoff Mayer, Brian McDonnell, 2007-06-30 When viewers think of film noir, they often picture actors like Humphrey Bogart playing characters like Sam Spade in *The Maltese Falcon*, the film based on the book by Dashiell Hammett. Yet film noir is a genre much richer. The authors first examine the debate surrounding the parameters of the genre and the many different ways it is defined. They discuss the Noir City, its setting and backdrop, and also the cultural, WWII, and institutional influences of the House Un-American Activities Committee and the Production Code Administration on the subgenres. An analysis of the low-budget and series film noirs provides information on those cult classics. With over 200 entries on films, directors, and actors, the *Encyclopedia of Film Noir* is the most complete resource for film fans, students, and scholars.

Voice & Vision Mick Hurbis-Cherrier, 2007 *Voice Vision* is a comprehensive manual for the independent filmmakers and film students who want a solid grounding in the tools, techniques, and processes of narrative film in order to achieve their artistic vision. This book includes essential and detailed information on relevant film and digital video tools, a thorough overview of the filmmaking stages, and the aesthetic considerations for telling a visual story. The ultimate goal of this book is to help you develop your creative voice while acquiring the solid practical skills and confidence to use it. Unlike many books that privilege raw technical information or the line-producing aspects of production, *Voice Vision* places creativity, visual expression, and cinematic ideas front and center. After all, every practical decision a filmmaker makes, like choosing a location, an actor, a film stock, a focal length, a lighting set-up, an edit point, or a sound effect, is also an expressive one and should serve the filmmaker's vision. Every decision, from the largest conceptual choices to the smallest practical solutions, has a profound impact on what appears on the screen and how it moves an audience. In Practice sidebars throughout *Voice Vision* connect conceptual

aesthetic and technical issues to their application in the real world Some provide a brief analysis of a scene or technique from easily rentable films which illustrate how a specific technology or process is used to support a conceptual narrative or aesthetic choice Others recount common production challenges encountered on real student and professional shoots which will inspire you to be innovative and resourceful when you are solving your own filmmaking challenges **Routledge**
