The Evolving Role of the Public Prosecutor Victoria Colvin, Philip Stenning, 2018-09-24 The modern public prosecutor is a figure both powerful and enigmatic Legal scholars and criminologists often identify three essential components of criminal justice systems police courts and corrections Yet increasingly the public prosecutor occupies a distinct role independent from any of these branches Acting outside of the court and therefore largely out of the public eye the prosecutor s control over whether and what charges proceed to court can limit judicial discretion on sentencing open pathways to alternative measures and even deny entry into the criminal justice system entirely In this sense the prosecutor serves as a true gatekeeper to the criminal process This book addresses key aspects of the evolving role of domestic and international prosecutors in common law and civil law systems in the twenty first century and the challenges posed by this evolution This collection of chapters from respected scholars takes an international comparative approach and explores how these different legal systems have borrowed theorisations and articulations of the prosecutorial role from each other in adapting the office to changing conditions and expectations The volume is structured around four main themes relating to the role of the modern prosecutor the nature of the prosecutor s office the role of the prosecutor in investigations prosecutorial discretion and how it is exercised and politicisation and accountability of prosecutors This book is essential for scholars and students in criminal justice pre law legal studies criminology justice studies and political science and is useful as a resource for those interested in legal change around the world

Rethinking Suburbs Khaled Alawadi, 2024-04-11 Rethinking suburbs provides answers to how can we design and plan neighborhoods in which non motorized mobility is a viable and efficient alternative and how the street systems and alleys of neighborhoods can be designed and retrofitted to make their urban fabrics more efficient and integrated Streets play significant roles in meeting multiple sustainability objectives This research addresses Abu Dhabi s and Dubai s street connectivity at the neighborhood local and city global scales It focuses on two parameters of street network analysis efficiency and centrality Efficiency is evaluated in terms of directness noting that network designs that provide short and direct access between origins and destinations are more efficient Centrality is evaluated using graph theory metrics that enable the identification of high and low accessibility locations within networks The conventional suburban model of low density automobile centric development with fragmented streets cannot foster high levels of

accessibility within neighborhoods This study offers an alternative evidence based suburban design model for future cities
