

Caution

• Reactions of pH test liquid with ground water containing free carbonic acid

- In the event that ground or well water is used in place of tap water, because of the ionization of free carbonic acid in the water, the pH of KANGEN Water may return to neutral 1-2 seconds after electrolysis (the pH test liquid turns from blue to green). Despite this, KANGEN Water retains many of its characteristics, tastes good, and is good for your health.
- **Test method:** Put 3 or 4 drops of the pH test liquid in an empty transparent glass. Pour KANGEN Water (pH 9.5) in the glass.
- **Reactions** : The solution turns somewhere between royal purple and blue just after adding the KANGEN Water and from blue to green in 1-2 seconds.

Cleaning with a cleaning cartridge

Caution Clean the unit after turning off power supply.

Cleaning cartridge

CL-7000

Plug
(red x 2pcs)

Clean the unit every 3~6 months, especially:

1. If you find small white particles mixed in with the KANGEN water.
2. When the pH level fails to vary in accordance with the unit's setting, as measured by pH indicator liquid.
3. When KANGEN water comes out sparingly, stops, or when drops of white liquid appear after using the unit.

- ① Remove the water filter cover and turn the water filter holder to remove the water filter.

- ② Mount the cleaning cartridge. Insert the water stop cap (attached) at the top of the secondary water hose (gray) and clean.

- ③ When cleaning is complete, close the faucet. Replace the water filter once removed to the original position again. Flow the water for 1-3 minutes.

Wyer Jr., Thomas K. Srull, 2014-02-25 This edition of the *Handbook* follows the first edition by 10 years The earlier edition was a promissory note presaging the directions in which the then emerging field of social cognition was likely to move The field was then in its infancy and the areas of research and theory that came to dominate the field during the next decade were only beginning to surface The concepts and methods used had frequently been borrowed from cognitive psychology and

had been applied to phenomena in a very limited number of areas Nevertheless social cognition promised to develop rapidly into an important area of psychological inquiry that would ultimately have an impact on not only several areas of psychology but other fields as well The promises made by the earlier edition have generally been fulfilled Since its publication social cognition has become one of the most active areas of research in the entire field of psychology its influence has extended to health and clinical psychology and personality as well as to political science organizational behavior and marketing and consumer behavior The impact of social cognition theory and research within a very short period of time is incontrovertible The present volumes provide a comprehensive and detailed review of the theoretical and empirical work that has been performed during these years and of its implications for information processing in a wide variety of domains The handbook is divided into two volumes The first provides an overview of basic research and theory in social information processing covering the automatic and controlled processing of information and its implications for how information is encoded and stored in memory the mental representation of persons including oneself and events the role of procedural knowledge in information processing inference processes and response processes Special attention is given to the cognitive determinants and consequences of affect and emotion The second book provides detailed discussions of the role of information processing in specific areas such as stereotyping communication and persuasion political judgment close relationships organizational clinical and health psychology and consumer behavior The contributors are theorists and researchers who have themselves carried out important studies in the areas to which their chapters pertain In combination the contents of this two volume set provide a sophisticated and in depth treatment of both theory and research in this major area of psychological inquiry and the directions in which it is likely to proceed in the future

Forest Diversity and Management David L. Hawksworth, Alan T. Bull, 2007-04-06 Drawing on research from biodiversity experts around the world this book reflects the diversity of forest types and forest issues that concern forest scientists Coverage ranges from savannah and tropical rainforests to the ancient oak forests of Poland issues explored include the effects of logging management practices forest dynamics and climate change on forest structure and biodiversity Here is a useful overview of current science for researchers and educators alike

A Pattern of Violence David A. Sklansky, 2021-03-23 A law professor and former prosecutor reveals how inconsistent ideas about violence enshrined in law are at the root of the problems that plague our entire criminal justice system from mass incarceration to police brutality We take for granted that some crimes are violent and others aren't But how do we decide what counts as a violent act David Alan Sklansky argues that legal notions about violence its definition causes and moral significance are functions of political choices not eternal truths And these choices are central to failures of our criminal justice system The common distinction between violent and nonviolent acts for example played virtually no role in criminal law before the latter half of the twentieth century Yet to this day with more crimes than ever called violent this distinction determines how we judge the seriousness of an offense as well as the perpetrator's debt and danger to society Similarly

criminal law today treats violence as a pathology of individual character But in other areas of law including the procedural law that covers police conduct the situational context of violence carries more weight The result of these inconsistencies and of society's unique fear of violence since the 1960s has been an application of law that reinforces inequities of race and class undermining law's legitimacy A Pattern of Violence shows that novel legal philosophies of violence have motivated mass incarceration blunted efforts to hold police accountable constrained responses to sexual assault and domestic abuse pushed juvenile offenders into adult prisons encouraged toleration of prison violence and limited responses to mass shootings Reforming legal notions of violence is therefore an essential step toward justice

Combinatorial Chemistry and Technologies Stanislav Miertus, Giorgio Fassina, 2005-04-12 Several books on the market cover combinatorial techniques but they offer just a limited perspective of the field focusing on selected aspects without examining all approaches and integrated technologies Combinatorial Chemistry and Technologies Methods and Applications answers the demand for a complete overview of the field covering all of the methodologies used in the design synthesis and screening of molecular libraries Now in its second edition this volume updates prior content and explores new areas such as catalysis applications in biotechnology and current ICS UNIDO activities Topics include the generation of molecular diversity by chemical methods using solution and solid phase chemistries biological approaches for the production and screening of peptides antibody and oligonucleotide libraries and the application of computer assisted approaches to guide library synthesis The book establishes the link between combinatorial chemistry and molecular modeling and illustrates the importance of economics and patenting in combinatorial technologies Valuable to technologists and researchers as an introductory survey on the many aspects of combinatorial chemistry and combinatorial technology Combinatorial Chemistry and Technologies Methods and Applications offers an overview of a field that promises broad applicability in the identification of new drugs as well as in diagnostics new materials and catalysis

The Expansion of Economics Shoshana Grossbard-Shechtman, Christopher K. Clague, 2016-07-08 Economics like most other social sciences is not a pure discipline Indeed it has been enhanced by the fact that there is so much overlap between it and the related fields of business industrial relations political science social psychology and sociology This book is the first attempt to explain how work in economics has influenced and benefited from a merging of economic analysis with the research practices of these related fields of study With contributions from leading economists from around the world it demonstrates how economics is leading the way toward a more unified social science

Dynamic Simulation and Virtual

Reality in Hydrology and Water Resources Management Ramesh S.V. Teegavarapu, Chandramouli V.

Chandramouli, 2021-07-27 *Dynamic Simulation and Virtual Reality in Hydrology and Water Resources Management* focuses on the understanding use and application of system dynamics simulation and virtual reality approaches for modeling the spatial and temporal behavior of natural and managed hydro environmental systems. The book discusses concepts of systems thinking and system dynamics approach and it furthers understanding of the dynamic behavior of natural and engineering systems using feedbacks and dynamic simulation. Numerous examples of models built using different system dynamics simulation modeling environments are provided. It also introduces concepts related to computer animation and virtual reality based immersive modeling. Applications of systems dynamics simulation with animation and virtual reality approaches for modeling and management of hydro environmental systems are illustrated through case studies. This text is ideal for water resources professionals, graduate students, hydrologic modelers and engineers who are interested in systems thinking, dynamic simulation and virtual reality modeling approaches. It will serve as a valuable reference for engineering professionals who model, manage and operate hydrosystems. Engineering educators will find the book immensely useful to enhance the learning experiences of students. Dr. Ramesh S. V. Teegavarapu is a professor at Florida Atlantic University with expertise in modeling water resources and environmental systems, hydroinformatics and climate change. Dr. Chandramouli V. Chandramouli is a professor at Purdue University Northwest. His expertise is in water resources and environmental modeling integrating artificial intelligence techniques.
