

A photograph of a dirt path leading through a forest. The trees on either side have autumn-colored foliage in shades of orange, yellow, and brown. The path is light-colored and leads towards a bright, hazy opening in the distance. The overall mood is contemplative and serene.

I think of it as saying Yes to Nothing. If your choice is either the wrong thing or nothing, however frightened you are, you've got to take nothing. Haven't you?

Nine Years Old M. Pollak, 2012-12-06 In 1972 Dr Margaret Pollak published her book *Today's Three Year Olds in London* This was a sensitive study of family life and the social environment of a large number of London children together with an account of their developmental assessment by various test methods She showed that variations of developmental performances were more closely related to the quality of family life than to social and economic factors Dr Pollak has now re-investigated the same children at nine years of age and this book is a record of her findings The differences in development which were noted at three years of age remain in the older children Those children who at three years of age were underachievers particularly in verbal and adaptive abilities are the children who at nine years can still be identified by lower achievement at school These results must be of important relevance to educationalists and all concerned with the psychologists as well as to paediatricians welfare of children We must all be disturbed by the failure of any children in our urban city centres to benefit from education and our anxieties must be heightened if amongst the underachievers there are particular groups who can be identified by their ethnic identities In Britain education in school occupies a relatively small part of a child's life Dr Pollak has identified some of the factors in a child's wider experience and especially in the total home environment which are associated with the persistence of inferior performance
