**November 2013 Economics Paper 2 Essay Grade 1o:**

The Invention of Childhood Creativity Cat Martins, 2024-11-15 This text offers a comprehensive analysis of the concept of the modern creative and imaginative child in Western education Drawing on archived sources and historical works it reframes childhood creativity as a social cultural and scientific construction asking how our thinking and acting toward the creative child have been produced historically The text dissects the discursive construction of creativity as a natural and developmental attribute of the child It argues that the idea of the White creative child constructed through comparative reasoning shaped by primitivism and illustrated through botanical metaphors as close to nature and the senses is a notion embedded with colonialities forming part of a Western civilizing project and entrenched power knowledge relations A compelling and original account of childhood creativity this text will appeal to researchers in arts education early childhood education curriculum studies and the history of education
