Neuromorphic Engineering Systems and Applications André van Schaik, Tobi Delbruck, Jennifer Hasler, 2015-07-05 Neuromorphic engineering has just reached its 25th year as a discipline In the first two decades neuromorphic engineers focused on building models of sensors such as silicon cochleas and retinas and building blocks such as silicon neurons and synapses These designs have honed our skills in

implementing sensors and neural networks in VLSI using analog and mixed mode circuits Over the last decade the address event representation has been used to interface devices and computers from different designers and even different groups This facility has been essential for our ability to combine sensors neural networks and actuators into neuromorphic systems More recently several big projects have emerged to build very large scale neuromorphic systems The Telluride Neuromorphic Engineering Workshop since 1994 and the CapoCaccia Cognitive Neuromorphic Engineering Workshop since 2009 have been instrumental not only in creating a strongly connected research community but also in introducing different groups to each other s hardware Many neuromorphic systems are first created at one of these workshops With this special research topic we showcase the state of the art in neuromorphic systems

Thomas Cole's Journey Elizabeth Mankin Kornhauser,Tim Barringer ,2018-01-29 Thomas Cole 1801 1848 is celebrated as the greatest American landscape artist of his generation Though previous scholarship has emphasized the American aspects of his formation and identity never before has the British born artist been presented as an international figure in direct dialogue with the major landscape painters of the age Thomas Cole s Journey emphasizes the artist s travels in England and Italy from 1829 to 1832 and his crucial interactions with such painters as Turner and Constable For the first time it explores the artist s most renowned paintings The Oxbow 1836 and The Course of Empire cycle 1834 36 as the culmination of his European experiences and of his abiding passion for the American wilderness The four essays in this lavishly illustrated catalogue examine how Cole s first hand knowledge of the British industrial revolution and his study of the Roman Empire positioned him to create works that offer a distinctive even dissident response to the economic and political rise of the United States the ecological and economic changes then underway and the dangers that faced the young nation A detailed chronology of Cole s life focusing on his European tour retraces the artist s travels as documented in his journals letters and sketchbooks providing new insight into his encounters and observations With discussions of over seventy works by Cole as well as by the artists he admired and influenced this book allows us to view his work in relation to his European antecedents and competitors demonstrating his major contribution to the history of Western art
