Tiersma, 2010-06-15 Technological revolutions have had an unquestionable if still debatable impact on culture and society perhaps none more so than the written word In the legal realm the rise of literacy and print culture made possible the

governing of large empires the memorializing of private legal transactions and the broad distribution of judicial precedents and legislation Yet each of these technologies has its shadow side written or printed texts easily become static and the textual practices of the legal profession can frustrate ordinary citizens who may be bound by documents whose implications they scarcely understand Parchment Paper Pixels offers an engaging exploration of the impact of three technological revolutions on the law Beginning with the invention of writing continuing with the mass production of identical copies of legal texts brought about by the printing press and ending with a discussion of computers and the Internet Peter M Tiersma traces the journey of contracts wills statutes judicial opinions and other legal texts through the past and into the future Though the ultimate effects of modern technologies on our legal system remain to be seen Parchment Paper Pixels offers readers an insightful guide as to how our shifting forms of technological literacy have shaped and continue to shape the practice of law today

Information Processing in Medical Imaging Harrison H. Barrett, 1993-06. This volume contains the proceedings of the thirteenth biennial International Conference on Information Processing in Medical Imaging (IPMI XIII) held on the campus of Northern Arizona University in Flagstaff, Arizona, in June 1993. This conference was the latest in a series of meetings where new developments in the acquisition, analysis, and utilization of medical images are presented, discussed, dissected, and extended. Today IPMI is widely recognized as a preeminent international forum for presentation of cutting edge research in medical imaging and image analysis. The volume contains the text of the papers presented orally at IPMI XIII. Over 100 manuscripts were submitted and critically reviewed, of which 35 were selected for presentation. In this volume, they are arranged into nine categories: shape description with deformable models, abstract shape description, knowledge based systems, neural networks, novel imaging methods, tomographic reconstruction, image sequences, statistical pattern recognition, and image quality.

Theory And Applications Of Image Analysis II: Selected Papers From The 9th Scandinavian Conference On Image Analysis Gunilla Borgefors, Horst Bunke, Patrick S P Wang, 1995-11-22. This book contains 31 selected papers out of 136 accepted from the 9th Scandinavian Conference on Image Analysis held in Uppsala, Sweden, 6-9 June 1995. They represent the very best of what is currently done in image analysis world wide, describing very recent work. The papers have been both considerably expanded and updated compared to the version in the conference proceedings, giving the readers a much better understanding of the issues at hand. The papers cover both theory and successful applications. There are chapters on Edges and Curves, Texture, Depth and Stereo, Scene Analysis, and 3D Motion, thus covering the chain from feature extraction to computer vision. Two important application areas are covered: Medical and Industrial.
