With the increase in urban population it became necessary to keep track of the object of interest In favor of SDGs for sustainable smart city with the advancement in technology visual tracking extends to track multi target present in the scene rather estimating location for single target only In contrast to single object tracking multi target introduces one extra step of detection Tracking multi target includes detecting and categorizing the target into multiple classes in the first frame and provides each individual target an ID to keep its track in the subsequent frames of a video stream One category of multi target algorithms exploits global information to track the target of the detected target On the other hand some algorithms consider present and past information of the target to provide efficient tracking solutions Apart from these deep leaning based algorithms provide reliable and accurate solutions But these algorithms are computationally slow when applied in real time This book presents and summarizes the various visual tracking algorithms and challenges in the domain The various feature that can be extracted from the target and target saliency prediction is also covered It explores a comprehensive analysis of the evolution from traditional methods to deep learning methods from single object tracking to multi target tracking In addition the application of visual tracking and the future of visual tracking can also be introduced to provide the future aspects in the domain to the reader This book also discusses the advancement in the area with critical performance analysis of each proposed algorithm This book will be formulated with intent to uncover the challenges and possibilities of efficient and effective tracking of single or multi object addressing the various environmental and hardware challenges The intended audience includes academicians engineers postgraduate students developers professionals military personals scientists data analysts practitioners and people who are interested in exploring more about tracking Another projected audience are the researchers and academicians who identify and develop methodologies frameworks tools and applications through reference citations literature reviews quantitative qualitative results and discussions *Information Security Practice and Experience* Weizhi Meng,Zheng Yan,Vincenzo Piuri,2023-11-07 This book constitutes the refereed proceedings of the 18th International Conference on Information Security Practice and Experience ISPEC 2023 held in Copenhagen Denmark in August 2023 The 27 full papers and 8 short papers included in this volume were carefully reviewed and selected from 80 submissions The main goal of the conference is to promote research on new information security technologies including their applications and their integration with IT systems in various vertical sectors **Multimedia Technology and Enhanced Learning** Shui-Hua Wang,Yu-Dong Zhang,2022-10-19 This proceedings ICMTEL 2022 constitutes the refereed proceedings of the 4th International Conference on Multimedia Technology and Enhanced Learning ICMTEL 2022 held in April 2022 Due to the COVID 19 pandemic the conference was held virtually The 59 revised full papers have been selected from 188 submissions They were organized in topical sections as follows internet of things and communication education and enterprise machine learning big data and signal processing workshop of data fusion for positioning and

navigation and workshop of intelligent systems and control *Doing AI* Richard Heimann, 2021-12-14 Artificial intelligence AI has captured our imaginations and become a distraction Too many leaders embrace the oversized narratives of artificial minds outpacing human intelligence and lose sight of the original problems they were meant to solve When businesses try to do AI they place an abstract solution before problems and customers without fully considering whether it is wise whether the hype is true or how AI will impact their organization in the long term Often absent is sound reasoning for why they should go down this path in the first place *Doing AI* explores AI for what it actually is and what it is not and the problems it can truly solve In these pages author Richard Heimann unravels the tricky relationship between problems and high tech solutions exploring the pitfalls in solution centric thinking and explaining how businesses should rethink AI in a way that aligns with their cultures goals and values As the Chief AI Officer at Cybraics Inc Richard Heimann knows from experience that AI specific strategies are often bad for business *Doing AI* is his comprehensive guide that will help readers understand AI avoid common pitfalls and identify beneficial applications for their companies This book is a must read for anyone looking for clarity and practical guidance for identifying problems and effectively solving them rather than getting sidetracked by a shiny new solution that doesn't solve anything *Energy Minimization Methods in Computer Vision and Pattern Recognition* Xue-Cheng Tai, Egil Bae, Tony F.
