Place, Space and Hermeneutics Bruce B. Janz, 2017-03-29 This book analyzes the hermeneutics of place raising questions about central issues such as textuality dialogue and play It discusses the central figures in the development of hermeneutics and place and surveys disciplines and areas in which a hermeneutic approach to place has been fruitful It covers the range of philosophical hermeneutic theory both within philosophy itself as well as from other disciplines In doing so the volume reflects the state of theorization on these issues and also looks forward to the implications and opportunities that exist Philosophical hermeneutics has fundamentally altered philosophy's approach to place Issues such as how we dwell in place how place is imagined created preserved and lost and how philosophy itself exists in place have become central While there is much research applying hermeneutics to place there is little which both reflects on that heritage and critically analyzes a hermeneutic approach to place This book fills that void by offering a sustained analysis of the central elements major figures and disciplinary applications of hermeneutics and place

contribution to the field by expanding the scope of philosophical hermeneutics to environmental issues It addresses a broad scope of environmental topics such as the Anthropocene climate change degrowth environmental justice the limits of language in understanding nature and environmental aesthetics in environmental practice Together the chapters show the crisis of regional and global environmental problems to be in part a crisis of interpretation The ways that human beings understand their relationship to environments shape and determine how to act and live within places Yet the values and ideals that different people have about their lived environments often come into conflict Thus hermeneutics plays an important role in environmental discourse it helps adjudicate these conflicting understandings This collection of essays demonstrates the unique way that environmental hermeneutics can be employed to understand environments in this age of the Anthropocene It will appeal to researchers and upper level students in environmental humanities environmental studies ethics and philosophy

Hermeneutics of Human-Animal Relations in the Wake of Rewilding Mateusz Tokarski, 2019-05-21 In consequence of significant social political economic and demographic changes several wildlife species are currently growing in numbers and recolonizing Europe While this is rightly hailed as a success of the environmental movement the return of wildlife brings its own issues As the animals arrive in the places we inhabit we are learning anew that life with wild nature is not easy especially when the accumulated cultural knowledge and experience pertaining to such coexistence have been all but lost This book provides a hermeneutic study of the ways we come to understand the troubling impacts of wildlife by exploring and critically discussing the meanings of ecological discomforts Thus it begins the work of rebuilding the culture of coexistence The cases presented in this book range from crocodile attacks to mice infestations and their analysis consequently builds up

an ethics that sees wildlife as active participants in the shaping of human moral and existential reality This book is of interest not only to environmental philosophers who will find here an original contribution to the established ethical discussions but also to wildlife managers and even to those members of the public who themselves struggle to make sense of encounters with their new wild neighbors

Placing Nature on the Borders of Religion, Philosophy and Ethics Dr Forrest Clingerman, Mr Mark H Dixon, 2013-06-28 The natural world has been humanized even areas thought to be wilderness bear the marks of human impact But this human impact is not simply physical At the emergence of the environmental movement the focus was on human effects on nature More recently however the complexity of the term nature has led to fruitful debates and the recognition of how human individuals and cultures interpret their environments This book furthers the dialogue on religion ethics and the environment by exploring three interrelated concepts to recreate to replace and to restore Through interdisciplinary dialogue the authors illuminate certain unique dimensions at the crossroads between finding value creating value and reflecting on one's place in the world Each of these terms has diverse religious ethical and scientific connotations Each converges on the ways in which humans both think about and act upon their surroundings And each radically questions the damaging conceptual divisions between nature and culture human and environment and scientific explanation and religious ethical understanding This book self consciously reflects on the intersections of environmental philosophy environmental theology and religion and ecology stressing the importance of how place interprets us and how we interpret place In addition to its contribution to environmental philosophy this work is a unique volume in its serious engagement with theology and religious studies on the issues of ecological restoration and the meaning of place
