How Children Use the Community for Learning Charles Ocelus Fitzwater, Effie Geneva Bathurst, Helen Katherine Mackintosh, Kenneth E Brown, Seerley Reid, Anita Carpenter, Wilhelmina Hill, 1953 **Bulletin** United States. Office of Education, 1965 **Mathematics as an Educational Task** Hans Freudenthal, 2012-12-06 Like preludes prefaces are usually composed last Putting them in the front of the book is a feeble reflection of what in the style of mathematics treatises and textbooks I usually call the didactical inversion to be fit to print the way to the result should be the inverse of the order in which it was found in particular the key definitions which were the finishing touch to the structure are put at the front For many years I have contrasted the didactical inversion with the thought experiment It is true that you should not communicate your mathematics to other people in the way it occurred to you but rather as it could have occurred to you if you had known then what you know now and as it would occur to the student if his learning process is being guided This in fact is the gist of the lesson Socrates taught Meno's slave The thought experiment tries to find out how a student could reinvent what he is expected to learn I said about the preface that it is a feeble reflection of the didactical inversion Indeed it is not a constituent part of the book It can even be torn out Yet it is useful Firstly to the reviewer who then need not read the whole work and secondly to the author himself who like the composer gets an opportunity to review the Leitmotivs of the book
