## Plane Of A Dogfish Shark:

**Biology of Sharks and Their Relatives, Second Edition** Jeffrey C. Carrier, John A. Musick, Michael R.

Heithaus, 2012-04-09 Virtually every area of research associated with sharks and their relatives has been strongly impacted by the revolutionary growth in technology. The questions we can now ask are very different than those reported even two decades ago. Modern immunological and genetic techniques, satellite telemetry and archival tagging, modern phylogenetic analysis, GIS and bomb dating are just a few of the techniques and procedures that have become a part of our investigative lexicon. A modern synthesis of the biology of Chondrichthyans. *Biology of Sharks and Their Relatives, Second Edition* discusses significant advances in the development and application of new molecular techniques to the understanding of the phylogenetic relationships among and between these groups. The book considers the effect of global changes on the status of sharks and their relatives and how advances in technology and analytical techniques have changed not only how we approach problem solving and scientific investigations but how we formulate questions. The book also introduces applications of new and novel laboratory devices, techniques and field instruments. This second edition of the award winning and groundbreaking original exploration of the fundamental elements of the taxonomy, systematics, physiology and ecology of sharks, skates, rays and chimaera presents cohesive and integrated coverage of key topics and discusses technological advances used in modern shark research. Offering a well rounded picture for students and researchers and far above competitors in scope and research, this new volume holds a wealth of data on the current status of Chondrichthyan research and provides the basis and springboard for original research. Cover photo by Justin Gilligan. *Underwater Encounters* Mary L. Peachin, 2014-05-19 Originally published as *The Complete Idiot's Guide to Sharks* Alpha Penguin in 2003, this new text includes updated information all presented in non scientific terminology including new shark species as well as up close and personal shark encounters experienced by the author as well as her dive buddies and others. One of the early recreational divers to venture into a shark cage, Mary Peachin has expanded on many personal up close underwater encounters with dozens of shark species to include all encompassing non scientific information about sharks.
