- Types of boundaries, plates and plate movement
- Plate boundaries

**Question:** What happens when two tectonic plates?

- Sliding:** Boundaries between plates are **transform faults** where two plates are moving past each other. When the two tectonic plates both move in the same direction it is called a **transform**. When they move in opposite directions it is called a **transform**.

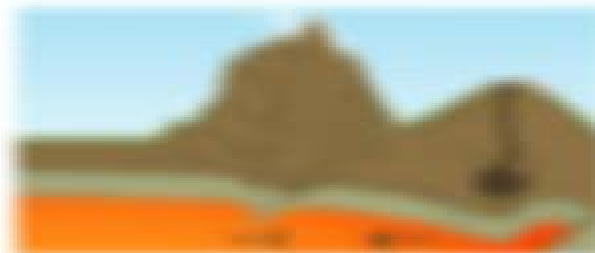

How would you describe the motion of plates in a different way?

The plates are sliding together and creating the land to move up - this is a mountain range.

- Sliding:** There is also a case of the plates moving together and after the plate moves. There are several types of **sliding** which are the plate moves.

Transform movement
