Discovering Science Through Inquiry: Matter Kit Rachel E. Green, 2010-05-12. The Discovering Science through Inquiry series provides teachers and students of grades 3-8 with direction for hands on science exploration around particular science topics and focuses. The series follows the 5E model: engage, explore, explain, elaborate, evaluate. The Matter kit provides a complete inquiry model for the exploration of the structure and properties of matter through supported investigation. Encourage students through activities such as studying the chemical properties of matter and investigating whether household items are acids and bases. Matter kit includes 16 Inquiry Cards in print and digital formats, Teacher's Guide, Inquiry Handbook. Each kit includes a single copy; additional copies can be ordered. Digital resources include PDFs of activities and additional teacher resources including images and assessment tools, leveled background pages for students, and video clips to support both students and teachers.

Clinician's Guide to the Assessment Checklist Series Michael Tarren-Sweeney, 2013-10-30. The Assessment Checklist

series created by Michael Tarren Sweeney provides the world's first standardised caregiver report measures of a range of attachment and trauma related mental health difficulties experienced amongst children growing up in foster adoptive kinship and residential care. This clinical manual provides essential guidance for child and adolescent mental health clinicians who use the Assessment Checklist measures including the Assessment Checklist for Children ACC, the Assessment Checklist for Adolescents ACA and the Brief Assessment Checklists BAC as part of their specialized assessments of children and adolescents in care. Split into three parts, the book explores all aspects of using and interpreting the Checklist series. Part 1 provides an overview of the Assessment Checklist measures, the rationale for their development and instructions on how to use the measures for clinical assessment, screening and treatment monitoring. Part 2 provides expert guidance to clinicians on interpreting Assessment Checklist score profiles and provides detailed information about several specific types of mental health difficulties measured by them. Part 3 describes the development and psychometric properties of the various Assessment Checklist measures, including information about their validity and reliability. It also introduces several new measures that are under development. Ideal for clinical child psychologists, child and adolescent psychiatrists, child psychotherapists and clinical social workers looking to improve the quality and depth of their clinical assessments with children and adolescents, this book provides essential guidance on professional use of the Assessment Checklist measures.

Artificial Intelligence in Education Carolyn Penstein Rosé, Roberto Martínez-Maldonado, H. Ulrich Hoppe, Rose Luckin, Manolis Mavrikis, Kaska Porayska-Pomsta, Bruce McLaren, Benedict du Boulay, 2018-06-20. This two volume set LNAI 10947 and LNAI 10948 constitutes the proceedings of the 19th International Conference on Artificial Intelligence in Education AIED 2018 held in London, UK, in June 2018. The 45 full papers presented in this book together with 76 poster papers, 11 young researchers' tracks, 14 industry papers and 10 workshop papers were carefully reviewed and selected from 192 submissions. The conference provides opportunities for the cross-fertilization of approaches, techniques and ideas from the many fields that comprise AIED, including computer science, cognitive and learning sciences, education, game design, psychology, sociology, linguistics as well as many domain-specific areas.

Mining and the Environment Karlheinz Spitz, John Trudinger, 2019-08-20. The history of mining is replete with controversy, of which much is related to environmental damage and consequent community outrage. Over recent decades, this has led to increased pressure to improve the environmental and social performance of mining operations, particularly in developing countries. The industry has responded by embracing the ideals of sustainability and corporate social responsibility. *Mining and the Environment* identifies and discusses the wide range of social and environmental issues pertaining to mining, with particular reference to mining in developing countries, from where many of the project examples and case studies have been selected. Following an introductory overview of pressing issues, the book illustrates how environmental and social impact assessment, such as defined in The Equator Principles, integrates with the mining lifecycle and how environmental and social management aims to

eliminate the negative and accentuate the positive mining impacts Practical approaches are provided for managing issues ranging from land acquisition and resettlement of Indigenous peoples to the technical aspects of acid rock drainage and mine waste management Moreover thorough analyses of ways and means of sharing non transitory mining benefits with host communities are presented to allow mining to provide sustainable benefits for the affected communities This second edition of Mining and the Environment includes new chapters on Health Impact Assessment Biodiversity and Gender Issues all of which have become more important since the first edition appeared a decade ago The wide coverage of issues and the many real life case studies make this practice oriented book a reference and key reading It is intended for environmental consultants engineers regulators and operators in the field and for students to use as a course textbook As much of the matter applies to the extractive industries as a whole it will also serve environmental professionals in the oil and gas industries Karlheinz Spitz and John Trudinger both have multiple years of experience in the assessment of mining projects around the world The combination of their expertise and knowledge about social economic and environmental performance of mining and mine waste management has resulted in this in depth coverage of the requirements for responsible and sustainable mining
