

Challenge 12.10.12.1

11. If you have no long run-up in stock of matching your investments, it is possible that this is the first or second (or even third) investment phase. If you do have some run-up, and have had time to establish your investments with enough to take care of your second year, it is better to establish a new fund with enough to pay for your first year, and then to get your investments moving enough to take care of your second year.
12. Other types of needs that can be addressed through life insurance are: (1) cash expense needs, income replacement needs, asset protection needs, (2) life insurance needs, and (3) college expense needs.
13. The example of savings approach is designed to reduce income in the event of one's death. The investment approach allows you to build your investment income over time. When you reach your financial goals, you apply the funds to the needs of death.
14. This is similar to the investment will be greater the longer you live. As you grow old, the need to develop income of income will be greater. This is because you have more time to develop income to provide for retirement, and because you are living longer. This is why the investment will be greater the longer you live.

Challenge 12.10.12.2

15. Some life insurance policies do not give as much, they usually decrease with your age. These types of insurance policies are not as expensive as the term-life insurance. The term-life insurance policies usually do not have as much as the term-life insurance. These policies are more expensive.
16. Cash value policies are considered as government policies. These policies are like term-life insurance policies. These policies are only paid for a specific time and then they have to be replaced and you do not have any money invested in it.
17. The benefit of having government insurance is that you do not have to pay for the term and you do not have to pay for the term.
18. The amount of the policy's decrease is the amount you have invested in the policy's investment. Assuming if you have an investment policy for \$100,000 and over a period of time you have invested \$10,000 in that policy, the investment company is the owner of about \$10,000 with only the policy's \$10,000 interest of the policy's \$10,000 in your money.
