Objective Of Plant Life In Eyfs:

How to Lead it: Primary Science Kirsty Simkin, 2025-08-14 Finding it hard to know what to prioritise as subject lead or how to work out which research is relevant and how it applies to your subject The How to Lead It series are the go to guides for primary subject leads in schools and trusts In them you will find clear summaries of relevant research and thinking around best practice age specific and inclusive classroom examples case studies reflective questions suggestions for short PD sessions with colleagues Everything in the book is applied thoughtfully to your specific subject area These books enable busy subject leaders to confidently make good decisions for effective teaching and impactful curricula All the key elements of the primary science curriculum are explored including curriculum planning assessment modelling engagement practical science and dialogue as well as support on how to approach research and a step by step guide to implementing changes in realistic and inclusive ways

The Project Approach in Early Years Provision Marianne Sargent, 2014-01-07 The Project Approach in Early Years Provision is designed to help early years students practitioners and managers understand and manage project work with young children The project approach is designed to enable early educators to ensure young children are learning in the best possible way by providing motivating learning opportunities Put the project approach into practice using the included resources with adaptable and printable planning and observation forms Link the approach to the requirements of all four British early years curricula Develop children s personal and social skills by encouraging collaboration with others Provide a meaningful context for children to practice their literacy and numeracy skills Promote sustained shared thinking by facilitating projects that involve children in active investigation discussion and debate Give each child the freedom to learn according to their individual needs interests aptitudes and abilities

Teaching Climate Change and Sustainability in the Primary Curriculum Karin Doull, Susan Ogier, 2023-11-18 The first aim of the DfE s 2022 Strategy for Sustainability and Climate Change is to prepare all young people for a world impacted by climate change through learning and practical experience This practical text for new teachers empowers them to develop their knowledge and understanding of climate change and sustainability It supports them to develop confidence in discussing difficult themes and to create safe learning spaces that allow children to articulate concerns The book provides a structure for learning and teaching about climate change and sustainability across the primary curriculum All chapters are linked to relevant and authentic research and include suggestions for practical activities

Teaching the Arts in the Primary Curriculum Susan Ogier, Suzy Tutchell, 2021-05-12 Learning in the arts does not fit in with simple conventional methodologies for teaching and assessing in the traditional sense but it has an immense power to transform children s understanding of the world around them and their lives Many jobs currently and of the future will demand the skills that learning in the arts will develop This book brings Arts Education sharply into focus as a meaningful learning experience for children of pre school and primary age 3 11 years It reinforces the potential for the wide range of physical mental and emotional development

through learning opportunities that engagement in arts practice facilitates Provides insight into how teachers can support children to consider contemporary challenges that face their generation Includes expert voices from the world of education to demonstrate an expansive and perhaps surprising view of where and how the Arts can be found Shows how we can bring the arts so easily into our curriculum and into our classrooms **Creative Development** Jane Johnston, Kathleen

series explores some of the continuous cycles that are happening in nature from the most familiar to the most hidden links

Readers can discover the different habitats shared by plants and animals and how they depend on each other for survival

often specially adapted to their environment Each title looks at the way human action disrupts natural cycles and what can

be done to protect them There is project work throughout and curriculum support for KS2 science using a hands on approach

Roland Ennos, Liz Sheffield, 2009-04-01 There are almost one third of a million species of plants which range in form from

unicellular algae a few microns in diameter to gigantic trees that can grow to a height of 100 meters Plant Life makes sense

of the bewildering diversity of plants by treating them not just as photosynthetic factories but as living organisms that are the

survivors of millions of years of evolutionary struggle The book examines plants from an evolutionary perspective to show

how such a wide range of life forms has evolved and continues to thrive The book is divided into three main sections The first

introductory section sets out the necessary background of evolutionary and taxonomic theory and introduces a classification

of living plants based on the ways in which they have evolved The second part investigates how the challenges of life in the

water and on land have led to the evolution of the major taxonomic groups of the plants and describes the key adaptations

that have contributed to the success of each group The final section shows how the contrasting environments of the world's

major climatic zones have led to the evolution of such different floras as those of tropical rainforests prairies and deserts This

section introduces a fascinating range of plants with ingenious and often bizarre methods of survival and reproduction The

book is enriched by detailed case studies points for discussion and suggestions for further investigation In addition extensive

color plates and line drawings bring the world of plants vividly to life Clear classification charts and a full glossary are also

useful Plant Life is an essential elementary text for undergraduate students and should prove a breath of fresh air for jaded

botanists who are accustomed to the traditional taxonomic grind through the plant kingdom New environmental approach in

keeping with modern course content Beautifully written in a clear concise and accessible style Extensive colour plates electron micrographs and line drawings bring the world of plants vividly to life Uses carefully chosen examples of species in each group so that students are not overwhelmed with excessive information and species lists Discussion questions at the end of chapters encourages further reading and provides essay topics for teachers Clear classification charts and a full glossary provide useful material for revision
