Practical Software Testing Ilene Burnstein, 2006-04-18 Based on the needs of the educational community and the software professional, this book takes a unique approach to teaching software testing. It introduces testing concepts that are managerial, technical, and process oriented using the Testing Maturity Model (TMM) as a guiding framework. The TMM levels and goals support a structured presentation of fundamental and advanced test-related concepts to the reader. In this context, the interrelationships between theoretical, technical, and managerial concepts become more apparent. In addition, relationships between the testing process maturity goals and such key players as managers, testers, and client groups are introduced. Topics and features: Process engineering oriented text. Promotes the growth and value of software testing as a profession. Introduces both technical and managerial aspects of testing in a clear and precise style. Uses the TMM framework to introduce testing concepts in a systematic evolutionary way to facilitate understanding. Describes the role of testing tools and measurements and how to integrate them into the testing process. Graduate students and industry professionals will benefit from the book, which is designed for a graduate course in software testing, software quality assurance, or software validation and verification. Moreover, the number of universities with graduate courses that cover this material will grow given the evolution in software development as an engineering discipline and the creation of degree programs in software engineering.

Private finance projects and off-balance sheet debt Great Britain: Parliament: House of Lords: Select Committee on Economic Affairs, 2010-03-17 This report recommends a reform of the way financial liabilities arising from private finance projects (PFPs) are treated in public accounts. The Government should publish figures for total PFP liabilities as a separate item alongside figures for public sector net debt. The Committee believes that PFPs whole life approach to projects in which the private contractor is responsible for long term maintenance as well as construction can have benefits and could be adopted more widely in public procurement. PFPs scope could be broadened to

include the transfer of further risks to the private sector including those of some mainstream services for example in the health and education sectors rather than just ancillary services as at present The report also deals with the growth in the secondary market for PFPs where investors sell on their stake in a project in many cases once the construction period of that project has been completed The Committee is concerned that the ability of construction companies to do this might negate one of the key advantages of PFPs over traditional procurement that the developers have an ongoing responsibility for maintenance and are therefore motivated to use high quality materials and construction processes The Committee queries some aspects of the value for money tests public authorities are required to undertake when comparing estimates of costs for PFPs with traditional procurement

Neumann,Kenneth M. Strzepek,2015-09-01 To sustain Africa s growth and accelerate the eradication of extreme poverty investment in infrastructure is fundamental In 2010 the Africa Infrastructure Country Diagnostic found that to enable Africa to fill its infrastructure gap some US 93 billion per year for the next decade will need to be invested The Program for Infrastructure Development in Africa PIDA endorsed in 2012 by the continent s Heads of State and Government lays out an ambitious long term plan for closing Africa s infrastructure including trough step increases in hydroelectric power generation and water storage capacity Much of this investment will support the construction of long lived infrastructure e g dams power stations irrigation canals which may be vulnerable to changes in climatic patterns the direction and magnitude of which remain significantly uncertain *Enhancing the Climate Resilience of Africa s Infrastructure* evaluates using for the first time a single consistent methodology and the state of the arte climate scenarios the impacts of climate change on hydro power and irrigation expansion plans in Africa s main rivers basins Niger Senegal Volta Congo Nile Zambezi Orange and outlines an approach to reduce climate risks through suitable adjustments to the planning and design process The book finds that failure to integrate climate change in the planning and design of power and water infrastructure could entail in scenarios of drying climate conditions losses of hydropower revenues between 5% and 60% depending on the basin and increases in consumer expenditure for energy up to 3 times the corresponding baseline values In in wet climate scenarios business as usual infrastructure development could lead to foregone revenues in the range

of 15% to 130% of the baseline to the extent that the larger volume of precipitation is not used to expand the production of hydropower Despite the large uncertainty on whether drier or wetter conditions will prevail in the future in Africa the book finds that by modifying existing investment plans to explicitly handle the risk of large climate swings can cut in half or more the cost that would accrue by building infrastructure on the basis of the climate of the past *Personal Finance* Patrick J. Mickiewicz,2005-11-11 Fifteen years ago twenty seven countries in Europe and Central Asia embarked on their economic transition paths For some the outcome was a considerable success Several others are still struggling to shed the inheritance of the past and to correct more recent policy mistakes Why were post Communist recessions so long in some countries and growth disappointing Why was fiscal performance so different Was democracy a factor which facilitated reforms or rather slowed them down This book discusses these questions in the context of new empirical evidence including a critical examination of the main themes in the economics of transition literature **The Financing of Small Business** Lauren Helena Read,2002-01-08 A detailed empirical study of how small business owners finance their enterprises this volume compares the experiences of women with those of men The author redresses an over reliance on subjective and anecdotal evidence of discrimination in this area with a controlled study of forty matched pairs of male female owners and their strategies for raising finances The research reveals the importance of adopting a theoretical framework in which the role of gender in the financing of small businesses is considered and the practical implications for female entrepreneurs banks and policy makers
