Harinder S. Ghuman, Richard M. Sarles

Sf 90r Manual:

Behavioral and Psychopharmacologic Pain Management Michael H. Ebert, Robert D. Kerns, 2010-11-25 Pain is the most common symptom bringing a patient to a physician's attention. Physicians training in pain medicine may originate from different disciplines and approach the field with varying backgrounds and experience. This book captures the theory and evidence-based practice of behavioral psychotherapeutic and psychopharmacological treatments in modern pain medicine. The book's contributors span the fields of psychiatry, psychology, anesthesia, neurology, physical medicine, and rehabilitation and nursing. Thus, the structure and content of the book convey the interdisciplinary approach that is the current standard for the successful practice of pain management. The book is designed to be used as a text for training fellowships in pain medicine as well as graduate courses in psychology, nursing, and other health professions. **Handbook Of Child And Adolescent Outpatient, Day Treatment** A Harinder S. Ghuman, Richard M. Sarles, 2013-06-17

In the past few years, there has been a major shift in the mental health care of child and adolescents from inpatient care to non-hospital community ambulatory settings. Economic pressures have primarily driven this change in service delivery. Insurance companies and managed care organizations have not only restricted access to hospitalization and limited length of stays but additionally have sharply reduced reimbursements for treatments. State and federal policies for inpatient treatment and reimbursement have followed similar trends. As a result, mental health planners have attempted to develop programs to deal with this trend of restricted inpatient care, shifting treatment of children and adolescents to home and community settings. Some of these new programs are well planned, and others are hastily planned and implemented. The pitfall to this community approach is that there is a population of chronically disturbed children and adolescents and highly stressed parents often lacking adequate personal and family resources who may not respond to these new, less restrictive, less costly community approaches which potentially may lead to an unsafe and dangerous situation for the child, adolescent, family, and the community. With this in mind, the purpose of this book is to provide comprehensive and up-to-date information regarding child and adolescent outpatient, day treatment, and community psychiatry. The emphasis of this book is to provide practical knowledge through clinical case illustrations and to explain various strategies in a detailed fashion. **Raj's Practical Management of Pain**
