Rogerian Paper Topics:

Instructor's Manual Patrick Geary, Patricia O'Brien, Nancy Wood, 2003-09 **Doing Counselling Research** John McLeod, 2003-05-16 This is a great starting point for anyone studying or interested in counselling research I would thoroughly recommend the Second Edition of this book Terry Hanley Healthcare Counselling and Psychotherapy Journal Doing Counselling Research Second Edition is a practical and accessible introduction to the research process within counselling and psychotherapy Written both as a guide to carrying out research and to using existing findings to inform practice it provides essential information for all trainees and practitioners John McLeod guides the reader through the principles and practice of undertaking a successful research project explaining how to review the literature select appropriate methods qualitative and quantitative collect data design and implement an effective study plan evaluate findings Taking account of developments in research methods the book has been fully revised and updated and includes new chapters on evidence based practice and practitioner research Research literacy is now within the skillset of all counsellors and psychotherapists and as a practical introduction to the subject Doing Counselling Research will be indispensable to trainees and practitioners alike **A Person-Centered Approach and the Rogerian Tradition** Adam Quinn, 2015-01-02 From the Book it is hypothesized that the therapist wants to understand for no other reason but to understand If the therapist is motivated to understand solely to be a change agent for the client then the facilitative mechanisms may not be sufficient because a tendency toward unconditional acceptance will not effectively emerge the published literature in the 1970s suggests that person centered therapy PCT researchers rather than pursuing novel avenues of empirical inquiry devoted substantial time in defending PCT against what now appear to be unfounded claims made by a group of social scientists who held significant professional interest in seeing through the dismantling of the person centered approach Book Summary This book is about a person centered approach to counseling and psychotherapy as developed by the psychologist Carl Rogers 1902 1987 and his colleagues In addition this book is also intended to be a handbook on the person centered approach and the Rogerian tradition for use in academic and non academic settings alike Each chapter is briefly summarized below Chapter 1 A Person Centered Approach and the Structure of Scientific Revolutions examines the trend of scientific inquiry in psychotherapy research specifically focusing on events and changes that took place beginning in the 1970s and are argued to have substantially influenced the direction of psychotherapy research in the following decades In particular these changes are suggested to have been guided by the choices made by a small but influential group of behavior and psychoanalytic oriented researchers which arguably led to changes in the scientific methods used to investigate the effectiveness of psychotherapeutic treatments and as will be shown in this chapter led to the decline and disappearance of Carl Rogers's person centered approach This chapter suggests that through a method of allegiance guided scientific inquiry the Rogerian tradition was systematically dismantled by a group of social scientists that held considerable professional interests to do so

Chapter 2 A Person Centered Approach to Multicultural Counseling Competence examines current and historical trends in psychotherapy research and practice with racial ethnic minority populations Using psychotherapy evidence from both the latter half of the 20th century and the initial decades of the 21st century cultural adaptations to previously hypothesized person centered therapy mechanisms of change are proposed Chapter 3 A Person Centered Approach to the Treatment of Borderline Personality Disorder addresses psychotherapy with a person described as possessing a borderline personality disorder BPD In particular a selection of mainstream approaches is reviewed to examine unique and universal aspects of current thinking about this treatment population Following this review an expanded analysis of person centered therapy is offered examining current research evidence and the mechanisms of change hypothesized to occur in the person centered treatment of BPD Chapter 4 A Person Centered Approach to the Treatment of Combat Veterans with Posttraumatic Stress Disorder examines posttraumatic stress disorder through the lens of military combat trauma that results in a breakdown of a combat veteran s sense of self and the world In the effective treatment of combat related posttraumatic stress disorder a therapist must help the veteran reorganize the self structure that has become incongruent with his or her precombat trauma self following his or her return home from war For the therapist to facilitate a veteran s becoming whole he or she must be genuinely congruent in the relationship
