

Management of Business

♦ RATIONALE

The dynamic environment within which businesses operate today present both challenges and opportunities for business leaders. The growth in economic and social needs in most economies also constitutes another area of great challenge. As students proceed beyond the Caribbean Secondary Education Certificate (CSEC) level, in pursuit of their career goals, they must be cognisant of the changing socio-economic climate within which modern businesses operate.

Management of Business students must understand the principles that govern the human and operational interactions within a business, and must be aware of how a business operates within a society. Moreover, it is imperative that students possess a comprehensive understanding of the markets in the region in addition to knowledge of the global marketplace.

The CAPE Management of Business syllabus provides not only a good foundation for further study of Management of Business and other related disciplines at the tertiary level, but also opportunities for students to function not only in existing business organisations, but also as successful entrepreneurs having developed the required knowledge and understanding of management principles, practices, and skills required to address managerial problems and the challenges faced by businesses.

The syllabus will also contribute to the development of the Ideal Caribbean Person as articulated by the CARICOM Heads of Government. That is, "someone who demonstrates a positive work ethic" and "values and displays the creative imagination in its various manifestations and nurtures its development in the economic and entrepreneurial spheres." In addition, in keeping with the UNESCO Pillars of Learning, on completion of this course of study students will learn to know, to do, to be, and to live together having been exposed to the values implicit within human rights and democratic principles, among others.

♦ AIMS

The syllabus aims to:

1. develop an understanding of the integrated nature of business organisations and the environment in which they operate;
2. develop an awareness of how global issues impact the development of business organisations with special reference to the Caribbean;

However, with today's ease of access to the Internet and free applications, teachers are now expecting students to go beyond the confines of text-only productions. Various online programs make it possible to create multi-layered term papers that are rich in images, audio, and even video. And most of these tools are free to use. Students can now access their work from nearly anywhere that has an Internet connection. In the case of collaborative research projects, this same technology allows team members to work with each other even when they are in different locations. A wide variety of online and offline tools, techniques, and tips to help students research, write, edit, prepare, and present term papers are discussed and explained here. This revelatory guidebook to the latest in term paper technology also supports Common Core Standards for the reading of technical accounts and texts.

Spirituality and Business in the Anthropocene Laszlo Zsolnai, 2025-08-18 This contributed volume collects innovative papers by scholars from Europe, India, and the USA to investigate how spirituality can contribute to renewing business in response to the challenges of the Anthropocene era. These challenges include climate change, biodiversity loss, ecosystems collapse, growing inequality, wellbeing deficiencies, and social unrest. Using insights from Christianity, Hinduism, Buddhism, and Existential Humanism, the book explores the spiritual aspects of the present ecological, economic, social, and ethical crises, materialist worldviews in the Anthropocene, and their relation to crises. Further, it reinterprets personalism for embracing ecological values, presents working models of spiritually based sustainability practices in business, and discusses the integration of spirituality into business education to foster a greater understanding of our interconnectedness with the planet and with each other. Part of the Palgrave Studies in Sustainable Business in Association with Future Earth book series, this interdisciplinary work will be of great interest to scholars and students of sustainability, spirituality in business leadership, and many other fields.
