

Student Exploration: Populations and Samples

Background: Frequency distributions describe the distribution of a population. A sample

Prerequisite Knowledge: Students should know how to draw using the compass.

1. **Frequency distributions** summarize descriptive information about data. A frequency distribution lists all values. A frequency table lists all values and counts all of the frequency for each value. A histogram shows the frequency distribution of data visually, without writing.

2. How would you describe the shape of this distribution?

Answer: It shows that the shape of the data is bell-shaped. It is a normal distribution.

3. In the above graph on right, sketch what you think the frequency distribution might look like if the data is skewed. Explain what might be different about the data.

Student Exploration

4. In statistics, a **population** is a group of individuals. A **sample** is a group of individuals. A **frequency distribution** is a table or graph that shows the frequency of each value in a population. A **sample** is a group of individuals. A **frequency distribution** is a table or graph that shows the frequency of each value in a population.

5. How can you tell if a distribution is a normal distribution? (The shape of the distribution is bell-shaped, symmetric, and the data is normally distributed.)

What is the mean of each distribution? (The mean is 100.) (The mean is 100.)

6. How can you tell if a distribution is a normal distribution? (The shape of the distribution is bell-shaped, symmetric, and the data is normally distributed.)
