With a team of international authors from leading universities in research and teaching in higher education for sustainable development, this Handbook brings together a broad range of research approaches and shows how these approaches are reflected in the research practice in higher education for sustainable development. Key topics include Research Paradigms and Methodologies, Ongoing and Future Directions of Research, Meta Analysis and Reviews, Policy and Politics, Challenges for Implementation, Action Research and Transdisciplinary Perspective, Gender Diversity and Post Colonial Perspectives, Operationalising Competencies, Outcome Oriented Research, Curriculum Change, Organisational Change and Organisational Learning, Community and Partnerships, University Appraisal Systems and Indicators, Evaluation Approaches, Engaging Academic Teachers, Good Practice, Learning and Teaching, Transformative Leadership and Change Strategies. This Handbook is an invaluable research and teaching tool for all those working in higher education for sustainable development.

A Guide to Teaching in the Active Learning Classroom Paul Baeppler, J. D. Walker, D. Christopher Brooks, Kem Saichaie, Christina I. Petersen, 2023-07-03 While Active Learning Classrooms or ALCs offer rich new environments for learning, they present many new challenges to faculty because among other things they eliminate the room's central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed. The importance of learning how to use these classrooms well and to capitalize on their special features is paramount. The potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different from traditional classrooms and lecture halls. This book provides an introduction to ALCs, briefly covering their history and then synthesizing the research on these spaces to provide faculty with empirically based practical guidance on how to use these unfamiliar spaces effectively. Among the questions this book addresses are: How can instructors mitigate the apparent lack of a central focal point in the space? What types of learning activities work well in the ALCs and take advantage of the affordances of the room? How can teachers address familiar classroom management challenges in these unfamiliar spaces? If assessment and rapid feedback are critical

in active learning how do they work in a room filled with circular tables and no central focus point How do instructors balance group learning with the needs of the larger class How can students be held accountable when many will necessarily have their backs facing the instructor How can instructors evaluate the effectiveness of their teaching in these spaces This book is intended for faculty preparing to teach in or already working in this new classroom environment for administrators planning to create ALCs or experimenting with provisionally designed rooms and for faculty developers helping teachers transition to using these new spaces International Day of Persons with Disabilities – Children's Disabilities Olaf Kraus de Camargo, Thorsten Langer, Nihad A. Almasri, 2024-10-29 The International Day of Persons with Disabilities IDPD serves to globally promote an understanding of disability issues and mobilize support for the dignity rights and well being of persons with disabilities The theme of the most recent United Nations Day was transformative solutions for inclusive development the role of innovation in fuelling an accessible and equitable world It is in this spirit that Frontiers in Public Health is launching a new article collection inspired by this UN day with a specific focus on children with disabilities and how innovative public health solutions to support them can contribute to making the world a more equitable and prosperous world for all

Grant, M.D., M.P.H., J.D., Samuel R. Chamberlain, MBBChir, Ph.D., MRCPsych, Anthony Pinto, Ph.D., 2019-10-15 Obsessive compulsive personality disorder OCPD is

characterized by a pervasive and maladaptive pattern of excessive perfectionism preoccupation with orderliness and details and need for control over one's environment. It is the most common personality disorder and is associated with significant morbidity and increased health costs. Unfortunately, clinicians often do not diagnose OCPD or may incorrectly diagnose it as obsessive compulsive disorder (OCD) or attention deficit hyperactivity disorder. Although progress has been made in understanding OCPD, many treatment providers do not know how best to address it clinically. This book examines treatment options along with developmental psychological and behavioral etiologies and the deeper neurobiological underpinnings of the disorder.

Web and Network Data Science Thomas W. Miller, 2015. Master modern web and network data modeling both theory and applications. In *Web and Network Data Science*, a top faculty member of Northwestern University's prestigious analytics program presents the first fully integrated treatment of both the business and academic elements of web and network modeling for predictive analytics. Some books in this field focus either entirely on business issues (e.g., Google Analytics and SEO) or are strictly academic, covering topics such as sociology, complexity theory, ecology, applied physics, and economics. This text gives today's managers and students what they really need: integrated coverage of concepts, principles, and theory in the context of real-world applications. Building on his pioneering Web Analytics course at Northwestern University, Thomas W. Miller covers usability testing, Web site performance, usage analysis, social media platforms, search engine optimization (SEO), and many other topics. He balances this practical coverage with accessible and up-to-date introductions to both social network analysis and network science, demonstrating how these disciplines can be used to solve real business problems.

Scholarly Publishing and Research Methods Across Disciplines Wang, Viktor, 2018-11-09. There is no singular best method of research. The differing nature of various research endeavors warrant multiple ways of generating knowledge, sharing knowledge, and more importantly, avoiding errors. More recently, the dichotomy between quantitative and qualitative approaches has begun to dissolve as the integrated approach of mixed methods gains popularity. *Scholarly Publishing and Research Methods Across Disciplines* is a collection of innovative findings on the methods and applications of research in scholarly publishing, ranging from the analyzation of mixed methods and qualitative/quantitative research to Dewey's scientific method and more. Highlighting a range of topics including higher education, digital divide, and model development, this publication applies a cross-disciplinary viewpoint that will appeal to researchers, graduate students, academicians, librarians, scholars, and industry-leading experts around the globe seeking an understanding of the limitations and strengths in research techniques.

Centering Humanism in STEM Education Bryan Dewsbury, Susannah McGowan, Sheila S. Jaswal, Desiree Forsythe, 2024-09-24. Research demonstrates that STEM disciplines perpetuate a history of exclusion, particularly for students with marginalized identities. This poses problems, particularly when science permeates every aspect of contemporary American life. Institutions' repeated failures to disrupt systemic oppression in STEM has led to a mostly white, cisgender, and male scientific workforce replete with implicit and/or explicit biases.

Education holds one pathway to disrupt systemic linkages of STEM oppression from society to the classroom. Maintaining views on science as inherently objective isolates it from the world in which it is performed. STEM education must move beyond the transactional approaches to transformative environments manifesting respect for students' social and educational capital. We must create a STEM environment in which students with marginalized identities feel respected, listened to, and valued. We must assist students in understanding how their positionality, privilege, and power both historically and currently impacts their meaning making and understanding of STEM.

Managing Educational Technology Sandra Schamroth Abrams, Xiaojun Chen, Michael Downton, 2018-03-05. *Managing Educational Technology* examines the ways in which stakeholders from businesses, K-12 schools, and universities can influence the quality and success of technology integration in primary and secondary classrooms. Inspired by their experiences in the field as educators, education researchers, and technology evaluators, the authors present vignettes that highlight the benefits, demands, and limitations often associated with the introduction and integration of educational technologies to K-12 school environments. These examples also underscore the inherent nuances in partnerships among businesses, K-12 schools, and universities. Readers can use these rich examples when considering ways to integrate products into schools, as well as when discussing, analyzing, and evaluating the promises and challenges in doing so. End of chapter questions guide readers to consider alternate actions and identify steps for additional growth, which complement the authors' practical suggestions to strengthen business-school-university partnerships. Any reader interested in educational technology, educational leadership, or business will benefit from this insightful investigation of business-school-university partnerships.

Designing Sustainable Futures Joseph Press, Manuela Celi, 2024-10-28. We are in a decisive decade that demands more inspired and informed practitioners who can use positive futures to rebalance the present. The book you hold seeks to be a thought-provoking approach to imagine, create, and lead the journey to a more sustainable world where a spectrum of choices, including regenerative practices, await conscientious citizens, companies, and communities. With this objective and to help reverse the megatrends of economic disparity, social injustice, and climate change, the Institute for the Future (IFTF) and the Design Department of the Politecnico di Milano came together to prototype an approach to prepare all practitioners who seek to leverage the future to infuse our present with more impact and agency. Guided by global experts and inspired by a growing network of future makers, the authors share essential insights from this emerging landscape, offering thought-provoking theory, innovative experiments, real-world experiences, and practitioner stories. We draw insight and inspiration from many contemporary theories and practices, including strategic foresight, experiential futures, speculative design, design fiction, systems design, participatory design, and transformative leadership, and an emerging entry with genAI augmented design. Regardless of whether you have a design or management background or want to create a for-profit or non-profit, this book enables professionals across industries, as well as students preparing for a career in strategy, innovation, or transformation, the knowledge, skills, and confidence to strengthen
