Frantz,2012-12-06 My interest in X Efficiency XE dates back to 1978 At the time I was writing the dissertation for my Ph D at Washington State University My dissertation was concerned with the role of attitudes in the school to work transition among young men I was advised by Professor Millard Hastay a member of my committee to look at Leibenstein's new book Beyond Economic Man One of the things that caught my attention was his behavioral description of selective rationality It seemed that Leibenstein's behavioral description of a selectively rational individual was very similar to what psychologists such as Abraham Maslow were reporting as being the product of a particular motivational system In other words I was impressed with the idea that what Leibenstein was referring to as X inefficiency was being discussed by psychologists as the way it often is So from the beginning I always considered the concept of X in efficiency to be a valuable one for understanding human behavior I have since come to believe that this is particularly true when considering behavior in non market environments i.e. within the firm Work on this book however can most realistically said to have started with work which I began in 1982 while I was a Visiting Scholar at Harvard University Professor Leibenstein suggested that I consider how some empirical evidence which was being cited as evidence for the role of property rights might also be consistent with XE theory The consistency in both directions is considerable Journal of the American Dietetic Association ,2003 **Small Business Administration's Direct Loan Programs** United States.
